

Self Rescue Tool for Weak Ice Submergence

When submergence through weak ice happens, it's time for **GET a GRIP® ICE AWLS Ice Rescue Systems** to go into action. We have spent countless hours with professional rescuers developing what they needed to increase their safety. They wanted a product that worked flawlessly time and time again that didn't have any moving parts that would break and leave them stranded. They needed something they could count on 100% of the time. They wanted a product that just didn't chip the ice but held firm to the ice. This ultimately resulted in the creation of **GET a GRIP® ICE AWLS** by Ice Rescue Systems.
