

Retriever 120' - Dog Rescue System

Ice Rescue Systems introduces the Retriever 120' (dog rescue system). While there are many "dog snaring" devices on the market today, none will protect the rescuer better than the Retriever 120' (dog rescue device). Ice Rescue Systems has designed the Retriever 120' (dog rescue device) to keep the rescuer independent of the dog. It is safer for the rescuer to reach out and "snare" the dog, as opposed to getting in the water and lifting the dog out. Most dogs are in a vulnerable, stressed and highly unstable situation when trapped in the ice and water, which in turn makes them fearful of the rescuer. The Retriever 120' (dog rescue device) offers rescuer protection and gentleness to the dog. The Retriever 120' comes complete with rope, bag and buoy.

FEATURES

- + Independent extraction from rescuer
- + Separate line attachment
- + Buoyant line
- + Pre-assembled "snare loop"
- + Adapts to TAC+1 RP Systems
- + Assists in dog extraction

BENEFITS

- + #1 - Protects rescuer
- + Independent from dog
- + Comes complete
- + Everything is BUOYANT - never lose another "dog catching" device again

TAC+1 Reach Pole with Retriever 120'
