

# REOPENING RESTAURANTS & FOOD OUTLETS

In preparation of reopening post-lockdown, ensure you have the necessary hygiene practices in place to provide a safe dining experience for your customers.

## ECO-LYTE (NTL) is the SOLUTION!

A fast-acting, non-toxic disinfectant that kills all known bacteria and viruses on contact.

### One disinfectant to do it all!

#### Wiping

Wipe all high-touch surfaces for an instant disinfection of counters, tables, door handles, taps, menus and condiment dispensers. No gloves required.

#### Washing

Wash fresh produce to remove pesticides and bacteria, as well as extending shelf life.

No rinsing necessary.

Use in crushed ice for keeping fish and seafood fresh.

#### Hand Sanitising

Use as an alcohol-free, powerful hand sanitiser for staff and customers. It's gentle on skin so you can use it as often as you like, even kids' hands are protected.

#### Spraying

Nothing beats the on-the-go convenience of a quick spray disinfectant for machinery, appliances, tools, preparation surfaces, sinks and basins.

#### Fogging

To ensure a fresh start each day, decontaminate and reduce odors by fogging all spaces.

No protective gear required.

Even fog while people are present without harm.

#### Sterilising

Sterilise dustbins and waste areas, soak work tools and cutting boards, and spray onto clean fryers, grills and ovens.

#### Misting

Ideal for use in misting tunnels to reduce surface contamination on skin and clothes.

Non-toxic, non-irritant and 100% safe for humans.

Eco-Lyte (NTL) is a tasteless, colourless transparent biocidal liquid with a neutral pH - formulated to replace toxic chemical disinfectants with a single chemical free, biodegradable solution. NRCS Certified & SABS tested.

Available in 1L, 5L and 25L volumes. Application equipment is also available on request.
