MATRIX *Carbon Composite Dynamic AFOs*

Abraham, originally from Mexico, began working for Trulife in 2020.

With more than a decade of professional experience, he has successfully led projects for the aerospace, automotive, and medical device industries.

Abraham is responsible for the design and development of Trulife's Matrix dynamic ankle foot orthotics and composite materials, including the NEW Matrix Pace and Matrix L-Pace, the perfect posterior additions to the Matrix Family.

Development Engineer

Matrix Family

Matrix Family of Carbon Composite Dynamic AFOs

The Matrix family has been developed to offer patients a dynamic response carbon AFO that can be used to treat a wide variety of gait deficits.

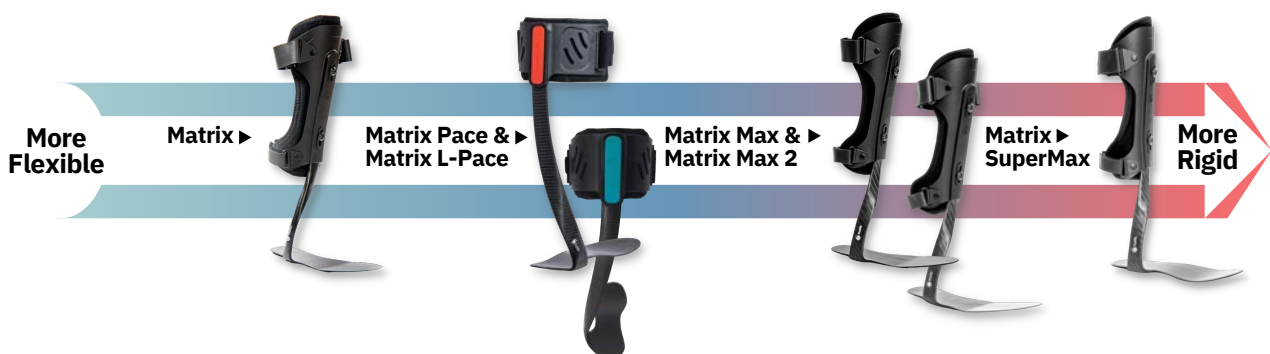

Trulife's newest inclusions **Matrix Pace** and **Matrix L-Pace** are the perfect posterior additions to the Matrix Family.

Matrix Ankle Foot Orthotics

Matrix Pace

The NEW Matrix Pace offers Comfort, Durability and Style

- 2 year warranty on hardware.
- Posterior medial strut of intermediate stiffness for best combination of support, flexibility and energy return.
- Ergonomic footplate with curved heel for better foot fitting.
- Narrower footplate for greater variety of compatible footwear.
- Breathable padded cuff with reverse pull hook and loop compatible strap.
- Flexible high strength band that easily conforms around calf muscles.

Indications:

Low to high activity patients with unilateral or bilateral drop foot.

Matrix L-Pace

- Posterior lateral strut of intermediate stiffness for best combination of support, flexibility and energy return.
- Made from aerospace grade composite materials for lightweight and durability.
- Ergonomic footplate with curved heel for better foot fitting.
- Flexible high strength band that easily conforms around calf muscle.
- Breathable padded cuff with reverse pull hook and loop compatible strap.

Indications:

Low to high activity patients with unilateral or bilateral drop foot.

Matrix Ankle Foot Orthotics

Matrix

- Energy storing, composite footplate and strut.
- Lateral strut is anterior to malleolus.
- Open calcaneal design.
- Custom-fit, anterior shell and footplate.

Indications:

Low activity patients with simple, unilateral or bilateral drop foot, maximum weight of 113 kg / 250 lb

Selection				
Model No. Right	Model No. Left	Size	Height	Foot Length
FH200R02	FH200L02	Small	39-42cm / 15.5-16.5"	<25cm / <9.8"

FH200R04	FH200L04	Large	43-46cm / 17-18"	25-29cm / 9.8-11.4"

Specifications	
Matrix	
Material	Carbon Composite
Includes	Hex Key, Tibial Pad x2
Warranty	Hardware: 2 years Soft goods: 90 days

Matrix Max

- Lightweight, carbon composite frame with enhanced stability.
- Reinforced lateral strut that is anterior to malleolus.
- Open calcaneal design.
- Custom-fit, anterior shell and footplate.

Indications:

Low to high activity patients with unilateral or bilateral drop foot; suitable for partial foot amputations; suitable for mild quadriceps weakness.

Selection				
Model No. Right	Model No. Left	Size	Height	Foot Length

Matrix Ankle Foot Orthotics

Matrix Max 2 (Trimmable)

- Easy-Trim foot plate allows fitting of up to 3 shoe sizes with one product.
- Advanced reinforced lateral strut for greater stability, durability and energy return.
- Narrower foot plate in the medial arch allowing for an easier shoe fit.
- Heat-mouldable, trimmable and height adjustable anterior shell.

Indications:

Low to high activity patients with unilateral or bilateral drop foot; suitable for partial foot amputations; suitable for mild quadricep weakness.

Selection				
Model No. Right	Model No. Left	Size	Height	Foot Length

Warranty	Hardware: 2 years Soft goods: 90 days

Matrix SuperMax

- Enhanced integration of the foot plate and strut for added durability and support.
- Footplate is uniquely designed to allow greater energy reflection at toe off.
- Streamline to fit in shoes better.
- Shank angle increased to 82° to improve knee extension movement at mid stance.
- Heat-mouldable, trimmable and height adjustable anterior shell.

Indications:

Low to high activity patients with unilateral or bilateral drop foot; suitable for partial foot amputations; suitable for mild to moderate quadricep weakness.

Matrix Ankle Foot Orthotics

Matrix Max Raw

- Lightweight, carbon composite.
- Ready for practitioner to create a custom anterior AFO, or partial foot prosthesis.
- One size.

Indications:

For use in the creation of a custom dynamic response carbon composite AFO that can be used to treat a wide variety of gait deficits.

Selection				
Model No. Right	Model No. Left	Size	Height	Foot Length
FH225R	FH225L	One Size	37cm / 14.5"	29cm / 11.5"

Specifications	
Matrix Max Raw	
Material	Carbon Composite
Includes	White Shrink Tube, Stainless Steel Inserts, M4 Screws, Black Shrink Tube x2
Warranty	Hardware: 2 years

Matrix Composite Struts

- Prepreg composite struts for manufacturing custom posterior strut type AFOs.
- Available in 2 widths, each with two levels of flexibility (Medium, Firm)
- Length of 18" (45 cm) which is to be trimmed to required length.
- Provides excellent mediolateral stability similar to a rigid ankle type AFO while still allowing graded plantarflexion and dorsiflexion.

Indications:

For use in the creation of custom posterior strut AFOs to treat a wide variety of gait deficits.

DynaPro™ Torticollis Orthosis

Ideal “static – dynamic” therapy to reverse mild to severe Torticollis. Provides abnormal reflex arc neuro therapy for patients with spasticity.

- Treats lateral flexion of the head and neck.
- Bend to fit shoulder cuff which allows for quick and easy customisation for creating a tailored product for the patient.
- Semi-rigid heat mouldable upright with ‘flex’ technology, which allows for a gentle stretch to reverse tissue shortening or manage lateral cervical flexion spasticity

Indications:

Tissue shortening / Torticollis

S.O.M.I. Orthosis

- Sternal Occipital Mandibular Immobiliser.
- Immobilises head in practitioner specified position.
- Removable chin support.
- Allows patient to lie flat.
- Easy to fit in supine position.

Indications:

C4/5–T3/4 stable fractures, post-operative stabilisation.

Selection

Includes	2 Chin Pads
Warranty	90 Days

Cervical

Lerman Minerva

- Manufactured with non-ferrous material.
- Used to support and stabilise cervical spine and upper thoracic spine after injury or surgery.
- Includes: Back Pad, Chin Pad (2), Chest Pad, Occipital Pad, Head Band Assembly.

Indications:

C2-T3 stable fractures, muscular/ligamentous injury, degenerative joint disease, cervical pain/nerve impingement.

Contraindications:

Unstable fractures, type II dens fractures.

Selection		
Model No.	Size	Height

Includes	2 Pad Sets
Warranty	90 Days

Lerman Non-Invasive Halo

- Secure cervical stabilisation.
- Colour coded buckles for ease of application.
- Designed to be donned/doffed in supine position to simplify fit.
- Removable anterior plate for emergency Cardiopulmonary Resuscitation.
- Polyethylene / composite plate material.
- Manufactured with non-ferrous materials.
- One size fits most.

Indications:

Cervical spine immobilisation of stable, non-displaced or minimally displaced fractures.

SpinAir Back Orthosis

- A thoracic lumbar immobilization brace consisting of a paravertebral structure (duralumin splint) that shapes and adjusts to the spine by means of an elastic pelvic band and paravertebral straps inserted into the back through a buckle and fastened at the front of the pelvic band producing retropulsion of the shoulders and promoting good alignment of the back.
- It aligns with the spine and corrects kyphotic posture while releasing the vertebral bodies from pressure and wedging. It partially limits lateral and flexion/extension movements of the spine.
- It is specifically designed for patients with osteoporosis and kyphosis, correcting posture dynamically and gradually to maximize patient comfort.
- It is supplied preformed, but needs to be moulded to each patient's spine before fitting.

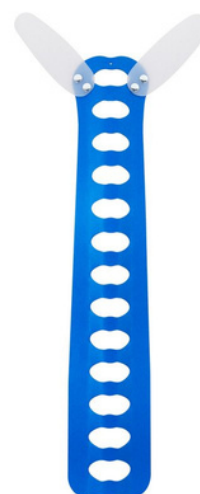

Indications:

Osteoporosis, degenerative processes, degenerative discopathy, muscular hypotonia, osteoporotic fracture, lower and upper back pain, posture rehabilitation, post-operative care.

Selection			
Model No.	Size	Height From S1-C7	Hip Circumference

Pectus Pro Pectus Carinatum Orthosis

- Provides increased anterior/posterior directed corrective compression forces.
- New and improved design.
- Wider size range (29-41") to accommodate larger chests.
- New ratchet closure for greater durability.
- Optional, soft, shoulder straps included for additional stabilisation during wear.
- 2.5" of lateral adjustment for asymmetric Pectus Carinatum.
- Removable, washable and breathable pads for increased comfort.
- Slide adjustment bars and screws.
- One size fits most.

Indications:

Abnormal chest shape, protrusion of both the sternum (breastbone) and the cartilage portion of the ribs, and bowed chest (Pigeon chest)

Elbow Orthoses

DynaPro™ Flex Elbow

Ideal “static – dynamic” therapy to reverse mild to moderate tissue shortening contractures of the elbow (< 90°)

- Treats mild/moderate flexion.
- Abnormal reflex arc therapy provided by the device assists with neuro-rehabilitation.
- Axial hinge with legible goniometer facilitates brace fitting.
- Antimicrobial material which helps to prevent odour and infection.
- Gel elbow pad included.

Indications:

Tissue shortening – mild to severe tone, fair to good end feel, neurological hypertonicity/spasticity, neuro contracture management.

Lower Arm Circumference	Child: 9-16.5cm / 3.5-6.5" Youth: 13-18cm / 5-7" Small: 13-20cm / 5-8" Medium: 19-25cm / 7.5-10" Large: 23-30cm / 9-12"
Warranty	90 Days

SoftPro™ Static Gel Elbow

Ideal for providing positioning therapy for mild to moderate (< 90°) flexion contractures of the elbow. Double upright with single setting hinges which are set to provide the desired extension of the elbow. Rigid cuffs on bicep and forearm in soft cover; adjustable elbow cap.

- Static Therapy – Support, Protect and Position.
- Progressive Extension Stretch Therapy.
- Easily adjustable single setting hinge.
- Provides 3 point progressive extension stretch.

Indications:

RA-pain, inflammation, deformity, RSD-pain, with movement or stretch, tissue shortening, mild tone, poor end feel, fair end feel, poor skin integrity.

Warranty	90 Days

AirPro™ Grip

- Orthotic therapy for moderate to severe wrist, hand, finger joint stiffness, or contractures.
- Air Therapy - Low Load Prolonged Stretch.
- Provides gentle air stretch to reverse tissue shortening.
- Gently opens even the most severely non-fixed contracted hands.
- Ideal for spasticity management.
- Easy to apply and remove.

Indications:

Moderate to severe wrist, hand, finger joint stiffness, or contractures, tissue shortening of the MCP/PIP joints.
