

Detailed Assessment Data

Personalised Testing

Immediate Student Feedback

ClassComm 5 & ClassComm Cloud

ClassComm is an assessment software tool that will run on any machine or platform. Designed to give formative and summative assessment, when used with any Genee response handset or Virtual G-Pad, on students own hand held device (B.Y.O.D). Questions and slides can be created directly inside ClassComm, using its powerful content editor and templates can be stored and shared in an online customisable data-bank. Tests can be completed 'On or Offline' and given a specified time frame. All data can be reported in the form of charts and graphs which can be stored in the cloud.
