Access Control

Passive Cotag clamshell card

The 0968 is a passive card that does not include a battery. It can be used in combination with any Cotag reader. When it is used with a Cotag hands-free reader, the reading range is approximately 34 cm. With Cotag proximity readers, the reading range with the 0968 varies between 3 and 11 cm.

One of the major advantages of Cotag technology is that active and passive cards can be mixed in the same system to provide ultimate convenience and cost-efficiency.

*) The **0968** is a card without any numbers encoded. Customer needs to program the complete number segment.

The **0968-P** is a 0968 card which is encoded according to customer specification.
