

METAL & METAL1

Smart and proximity tags

Range : CDVI

A new, rugged range of tags, elegant in design and manufactured to withstand the rigours of being attached to a key-ring.

This new range has been designed and developed to offer users a reliable and rugged key tag. Constructed to prevent the "loop" from breaking when fixed to a key-ring, and cased in cast metal with polycarbonate covered epoxy for inner strength, the confidence in the METAL series has allowed us to offer the tags with a Lifetime Warranty.

The METAL1 proximity tags operate at 125kHz, this being the industry standard, and are compatible with all the CDVI proximity readers.

The METAL Mifare® tags operate at 13.56MHz and are multi-use tags as they are able to share information on the card/tag for other user requirements (vending etc).

METAL1

METAL

H.R.V.
HIGH RESISTANCE
TO VANDALISM

Specification

METAL1	Proximity tag
Dimensions	60 x 30 x 7mm
Frequency	125kHz
Colour	Black
Environmental	-25 to +70°C
IP Rating	IP67

METAL	Mifare®
Dimensions	60 x 30 x 7mm
Frequency	13.56MHz
Colour	Blue
Environmental	-25 to +70°C
IP Rating	IP67

Key features

- **Lifetime warranty**
- **Elegant design**
- **Rugged design**
- **Cast metal casing**
- **Polycarbonate/epoxy inner**
- **Proximity/Mifare® option**
