MANUFACTURING COUNTRY	UNITED KINGDOM
PACK SIZE (QUANTITY)	100 PER PACK
PACK SIZE (DIMENSIONS)	L 21.5 W 19CM H 7CM
RECYCLABLE	100% RECYCLABLE HOLDER & PACKAGING
WARRANTY	12 MONTHS
WEIGHT	697 GRAMS

PRODUCT INFORMATION

Our rigid ID card holders are available in 16 different colours, and are 100% biodegradable and fully recyclable. These biodegradable ID card holders include a natural additive that uses a process known as Anaerobic Digestion (AD), which remains dormant until subjected to microbe rich anaerobic environments, such as those found in landfill & oceans.

The Anaerobic Digestion (AD) uses the plastic as food, preventing harmful micro-plastics. The polymer chains are broken down & the microbes consume the plastic material, leaving behind only organic waste (Humus) & Methane, which is captured & used as a clean energy source (Bio-Gas). Our Biodegradable additive complies with The EU Framework Regulation (EC) No. 1935/2004 & (EU) No. 10/2011 (The Plastics Regulation). Tested via ASTM D5511, ASTM D5988 & ASTM D6691 standards. Our Biodegradable card holders also complies with FDA (compatible with food) and the Federal Food, Drug & Cosmetics Act & all Food additives regulations.
