

Qualica-RD NAOS

Long-life performance, high operational reliability and fast response.

Qualica-RD NAOS is the speed turnstile with the biggest advantage that the glass arm can be raised to 900-1800m (maximum) for high safety control, and the passage width can reach 550-900mm, which is suitable for wheelchair users or pedestrians with luggage.

The body is made of brushed stainless steel which is sturdy, rigid, anti-rust, waterproof and durable. Ideal for both indoor and outdoor use.

Suitable for any high level site, such as government building, chamber, bank, airport, stadium, etc.

QUALICA-RD

Features

- A choice of one-way or two-way is available.
- It has standard relay signal, which can be integrated with any type of third-party access control system (e.g. RFID, fingerprint and biometric reading device).
- In case of emergency, the arms will automatically open to allow free passage when it is turned off.
- Infrared sensor alarm functions, in case of illegal intrusion and reverse intrusion. Anti-intrusion function.
- The whole system operates smoothly, with low noise and no mechanical impact.
