LONG TERM PRESERVATION
OF YOUR PRECIOUS SAMPLES

Cryovial

Temperature Stability Upto -196°C / Volume Range 1/1.8/3.5/4.5ml

Cryovial

Temperature Stability Upto -196°C
Volume Range 1/1.8/3.5/4.5ml

What if you get an instrument which can store your experiment, and there is no variation in the results? Sounds like blessings! Cryovial is a tool which is designed to store biological materials at a temperature as low as -196°C . There are many kinds and types of Cryovial available in the market. They are widely advertised by showing their advantages and usage, But the rampant use of low-quality components and materials by few of the manufactures will lead to issues of accuracy, performance and durability.

Neuation's R&D department spends a lot of time learning about user feedback and expectations to better understand their needs. Accumax Cryovial is the result of such research-intensive effort resulting in a device which offers powerful, efficient performance with years of durability. Accumax Cryovial's volume range is 1/1.8/3.5/4.5ml and temperature stability as low as -196°C . It is designed in a way to have an easy and clear identification of the sample.

Product Features

V Bottom For Maximum
Sample Recovery

Autoclavable
121°C For 15Mins

Better Stability With Hepta
Foot For Self Standing
And Storage Efficiency

Easy Sample Identification,
Large And Clear Patch For
Personalized Labeling

Quick Seal Closure And
Leak Proof Tube Seal

Externally Threaded
Without O-ring To
Avoid Contamination

Certified
DNase RNase Free

Ordering Information

Cryovial			
Cat. No.	Description	Quantity/Pack	Quantity/Case
ACV01	1ml hepta foot Cryo with Cap, Nonsterile	100	100 X 10
