

The **Tactical Recon Kit** series contain a wide array of surveillance equipment, giving a technical surveillance operator the capability to deploy video/audio surveillance, communications and tagging, tracking and locating systems. The kit series range from **100 to 900**. This wide kit range gives an operator the ability to custom configure your kit based on your mission requirements.

Capabilities include:

- Short to long-range video and photo capture
- Audio transmission, storage, and capture
- Short to long-range night vision
- Color and monochrome surveillance cameras
- Digital and analog video transmitter/receivers
- Tagging, Tracking and Locating
- Installation tools and test equipment

TSE offers New Equipment Training (NET) at the National Reconnaissance Battle Lab in Fayetteville, NC at no cost to the government for new equipment purchases.
