

# DSLR Night Vision

TSE Inc. offers the AstroScope 9350, a modular night vision system that converts digital single-lens reflex cameras into powerful night-time image capture systems.

Inserted between the body and lens, the 9350 draws power from the camera body and allows the camera full control of the lens.

The 9350 is available in many variations, options include Pinnacle or Aviation grade intensifiers, variable gain, full-frame adapters, and mounts for most camera systems.

Optional adapters and housings are available to easily configure the 9350 for use with almost any camcorder, point and shoot camera, spotting scope, CCD camera, etc.

Please see our brochure for our Modular Night Vision System for additional configurations.

**PART #:**

**TSE-NV-9350-C**

(for use with Canon Camera and Lenses)

**TSE-NV-9350-VG-C**

(Variable Gain for use with Canon Camera and Lenses)
