WHAT IS DRILLBRUSH?

Drillbrush Medium Yellow 2 inch Short brush cleaning a tub overflow plate.

Drillbrush Power Scrubber is a line of drill-powered cleaning brushes built to work in cordless drills and impact drivers. By utilizing the power of a drill, Drillbrush products can effectively scrub tough surface stains without the strain of hand scrubbing.

Drillbrush was created in 2007 by car wash owner Anthony LaPolla. Looking to ease the discomfort of Carpal Tunnel Syndrome while cleaning rims by hand, he took a standard toilet scrub brush and modified it to fit in a cordless drill. The device wowwed car wash patrons and many asked where they could get one for themselves.

Drillbrush grew from a simple gadget to a successful e-commerce company, providing alternative scrubbing solutions to homeowners and professional cleaners across the globe.

We have sold brushes to companies such as General Mills, Boeing, Molson Coors, Nestle Purina, PepsiCo, and SpaceX, as well as government institutions such as The United States Air Force, United States Coast Guard, United States Navy, and The Swiss Armasuisse.

Drillbrush strives to make cleaning faster, easier, and more convenient for everyone from custodians to homemakers. We make brushes in all shapes, sizes, and textures to handle any surface. We also have a variety of scrub pads, extensions, and accessories to make sure our customers always have the right tools for the job.

Our brushes require a standard cordless drill or impact driver to use. We do not sell cordless drills, nor are they included with the brush upon purchase.

Founder Anthony LaPolla stands by a display of Drillbrush products.

Our brushes are color-coded based on stiffness and application, providing a quick visual cue on which brush you'll need. Below is a chart listing each available color, it's general application, the page it can be found on, and additional details and uses.

SOFT WHITE HOME & AUTO BRUSHES

PAGE 8

White brushes are the softest in the Drillbrush line and are perfect for scrubbing delicate surfaces, like windows, carpets, wood, and upholstery. It is also great for pet clean-up.

Additionally, white brushes are our go-to automotive brush; great for scrubbing rims, headlights, windshield, car seats, and trim. However, while the bristles are non-scratch, particles on your vehicle's surface are, so do not use drill-powered brush on automotive paint.

MEDIUM YELLOW BATHROOM BRUSHES

PAGE 10

The oldest and most versatile of our brushes, Medium Yellow brushes have been there since the beginning to help scrub up bathroom-based stains. Whether it be in the tub, shower, sink, or behind the toilet; if it's in the bathroom, it can handle it!

Medium brushes excel in other areas as well, such as cleaning car mats, outdoor rugs, and removing pet hair from furniture.

MEDIUM GREEN KITCHEN BRUSHES

PAGE 12

You wouldn't want to use your bathroom brush on food prep surfaces, so we've designated our Green brush as a kitchen brush to prevent cleaning cross contamination.

Green brushes can scrub linoleum, countertops, stovetops, refrigerator shelves, and small appliances like coffee makers and microwaves. These brushes can clean everything AND the kitchen sink.

MEDIUM BLUE MARINE, POOL, & OUTDOOR BRUSHES

PAGE 14

While Yellow is for bathrooms and Green is for kitchens, Medium Blue brushes are for everything else! They're great for marine-based applications, such as boat hulls, kayaks, canoes, and other watercraft.

They're also handy for scrubbing pool lining, boot trays, antiskid surfaces, and other outdoor surfaces that don't quite require a Stiff Red brush.

STIFF RED OUTDOOR & PATIO BRUSHES

PAGE 16

Red brushes are stiffer than the mediums, making them ideal for tough stains in and around the house. Stiff Red brushes are best suited for surfaces exposed to the elements, such as siding, gutters, shutters, vinyl furniture, decks, and jungle gyms.

They also hold their own cleaning stone planters, fire places, and tough messes in cellars and garages.

ULTRA STIFF GRILL & INDUSTRIAL BRUSHES

PAGE 18

If the rest can't do it, the Black brush can! The Ultra Stiff Black brush is for heavy duty cleaning and harsh surfaces. It's perfect for removing gristle from grill grates, cleaning ovens and fire pits, and scrubbing down lawn and industrial equipment.

Not only can it clean the toughest surfaces imaginable, it's strong enough to remove chipped paint and some rust stains.

The majority of Drillbrush products feature a 1/4 inch quickchange shaft, a bit that is compatible with most standard cordless drills and impact drivers. However, some more specialized products have different connection types. Below is a chart illustrating the different shafts we use.

DRILLBRUSH SHAFT GUIDE			
1/4" Quickchange Shaft	5/16" Hexagonal Shaft	5/16" 24 thread/inch Threaded Shaft	5/8" 11 thread/inch Threaded Nut
			
<ul style="list-style-type: none"> • Most common shaft type among Drillbrush products. • Fits all cordless drills and impact drivers. • Standard shaft for small to large sized brushes. • Heat-treated plated steel shaft. 	<ul style="list-style-type: none"> • Featured on Drillbrush 5-inch Hex brushes. (see page 20) • Fits standard cordless drills. • Does NOT fit impact drivers. • Durable plated steel shaft. 	<ul style="list-style-type: none"> • Featured on Drillbrush 5-inch Threaded brushes. (see page 20) • Fits variable speed polishers. Does NOT fit cordless drills or impact drivers. • Durable, Grade 8 heat-treated zinc-plated shaft. 	<ul style="list-style-type: none"> • Featured on Drillbrush 7-inch Industrial brushes. (see page 21) • Fits rotary polishers. NOT safe for use in grinders. • Industrial grade heat-treated plated steel nut. • Requires use of set screws to secure.

SAFETY GUIDE

When cleaning, particles and cleaning materials may become airborne. To protect your eyes, always wear a minimum of ANSI Z87.1 rated protective eyewear or goggles when working with Drillbrush products.

- If you have allergies or respiratory issues, be sure to wear a dust mask when working around mold, mildew, or heavy grime.
- Do NOT use Drillbrush products in corded drills, as the high torque may be too intense for the brush. Additionally, using a corded drill near water may pose an electrocution risk.
- Brushes and pads with a rating of "Stiff" or higher are very coarse. Do not use Drillbrush products on skin to avoid potential injury.
- While Drillbrush may be fun and easy to use, do not let children use Drillbrush products unattended.
- The Threaded-to-Quickchange adapter is a small object that may be considered a choking hazard. Keep small brushes and accessories away from small children.

Always use ANSI Z87.1 rated protective eyewear when using Drillbrush.

"I have rheumatoid arthritis, and this has made my life so much easier! My tub was disgusting, but now it's pure white and my hands didn't suffer!"

- JSciborski
Amazon Customer

No one brush can handle every cleaning task alone, which is why we offer brushes in a variety of different shapes and bristle configurations. Our brushes come in four distinct groups; Corner brushes, Flat brushes, Detail brushes, and Edge brushes.

Drillbrush corner cleaning brushes. From left to right; Mini Original, Original, Jumbo Original, and Cone-shaped Corner

Corner Brushes

Drillbrush corner brushes are rounded, bullet-shaped scrub brushes designed to get into tight corners and contoured surfaces.

Corner brushes are available in four shapes; Original, Mini Original, Jumbo Original, and Cone-shaped. The Original, Mini, and Jumbo, are cylindrically shaped and have bristles surrounding the block. The standard Original is a great general purpose brush, the Mini can get into tight spaces, and the Jumbo can clean larger surfaces.

The Cone-shaped corner brush has bristles trimmed into a sloped shape, which allows it to clean in tight 90-degree angled corners.

Drillbrush flat brushes. Clockwise left to right; 4 inch, 5 inch Hex, 7 inch, 5 inch, and 5 inch Thread

Flat Brushes

The Drillbrush flat brush is a disc-shaped brush with all the bristles arranged in a circle on one side of the block. These brushes are built for scrubbing flat, level surfaces.

There are five types of flat brush; 4 inch, 5 inch, 5 inch Hex, 5 inch Threaded, and 7 inch.

The 4 inch and 5 inch brushes are standard flat surface scrubbers, able to handle a variety of daily cleaning tasks. The 5 inch Hex and Threaded are functional similar to the 5 inch, but have different shafts for use in adjustable chuck drills and variable speed polishers respectively.

The 7 inch brush is a large brush for industrial grade professional cleaning. It has a threaded nut for use in rotary polishers.

Detail Brushes

Drillbrush detail brushes are small, round brush with bristles on one side designed for spot cleaning, detailing, and other small scale cleaning applications.

There are three detail brushes; the 2 inch Short, 2 inch Long, and 1 inch Long.

The 2 inch Short focuses on small but tough stains, such as cooked food splatter and toothpaste drops.

The 2 inch Long has longer bristles than the 2 inch, and can clean small fixtures like faucets and drain openings.

The 1 inch Long brush has the longest bristles of any Drillbrush and is designed for cleaning lug nuts, jars, and intricate trim work.

Drillbrush detail brushes. From left to right; 2 inch Short, 2 inch Long, and 1 inch Long

Drillbrush Edge brush.

Edge Brushes

The Drillbrush Edge brush is a wheel-shaped brush with a thin ring of bristles surrounding the outside of the block. This brush is designed to get into grout lines, grooves, and grated surfaces. The thin ring allows it to get into crevices that wider brushes are unable to hit.

Not only is it great for grout, but it also works well on thin surfaces like bike tires and on the soles of shoes and boots. Due to its design, it is also able to pull fine debris out of surfaces like mouse mats and bath rugs.

DRILLBRUSH SHAPE KITS

- Drillbrush products are sold individually and in assorted brush kits. Most brushes are available in every color and stiffness. Single brushes can be found on Pages 8 - 21.
- Brushes of different shapes are often bundled together in a kit to provide multiple options for the wide range of surfaces. Kits with brushes of the same color, but different shapes start at Page 26.
- Kits with multiple of one brush shape, but in different colors are on Page 38.
- Kits with varying shapes and colors are on Page 40.
- Kits that feature both brushes and our drill-powered scrubbing pads are highlighted on Page 44.
- Brushes paired with Cleaners and Buffers are on Page 47.
- For kits featuring our newest brushes (the Jumbo Original, Corner, and 1 inch Long), go to Page 22.

SOFT WHITE BRUSHES

Soft bristled brushes, also known as our "Home and Auto" brushes, are built for cleaning delicate surfaces, such as glass, carpets, wood, upholstery, and fabrics. It also makes for a great automotive brush, able to clean rims, tires, headlights, seats, and more!

- 1/4 inch quickchange shaft fits all cordless drills & impact drivers.
- Built for cleaning level surfaces.
- Great for cleaning deck planks and masonry.

5IN-S-R-QC-DB \$9.25

"I had two tile countertops with backsplashes that were installed 50 years ago and were quite dirty (bumpy-surface ceramic tile; white grout). These brushes (using a Makita battery-operated drill) made the job much easier and faster than using typical hand-scrubbing tools. The red brushes were the perfect stiffness and did not damage or scratch the tile."

Ultra Stiff 7 inch brush scrubbing deck planks

DRILL BRUSH POWER SCRUBBER JUMBO BRUSHES & KITS

The Jumbo Original brush is a variant of the Original with a longer block and additional bristles. This brush can clean corners and contoured surfaces like the Original, but the additional surface area allows it to double as a scrubber for flat surfaces.

Just because the Original brush was the first and longest running brush we made doesn't mean there isn't room to innovate, which is what we did for the Jumbo Original brush.

The Jumbo Original takes the corner-cleaning design that made the Original so popular and extends the block to create more surface area on the sides of the brush. This allows for multitasking, as you can scrub corners and flats using the same brush.

This brush is great for cleaning carpets, tub walls, and siding, as well as all the little nooks and crannies the Original brush could get into.

The Jumbo Original brush is available on its own and as a part of several new kits. The 42J and 42J-5X kits pair the Jumbo brush with a flat and detail brush, much like our flagship 42O kit. It can also be found in the E542J kit, which offers five brushes that cover the entire cleaning gamut, and in our 38-piece pad and brush kit (See Page 45.)

Medium Green Jumbo brush scrubbing the walls of a kitchen sink.

"These brushes are HEAVEN SENT. I never really understood the importance of these brushes. I do recall when people were raving all about these. Maybe it was because I didn't have a power drill at the time, but after buying a drill a couple years ago I decided to try the brushes and see what the talk was all about and let me say... I REGRET not buying these SOONER."

- DaveSincere

- Available in Soft White, Medium Yellow, Green, and Blue, Stiff Red, and Ultra Stiff Black.

CORNER BRUSHES & KITS

As the name implies, the Corner brush can clean in corners, specifically tight 90-degree angled surfaces that would be hard for Original-style brushes to get into. The cone-shaped bristles allow the users to get flush with the wall without the block hitting the surface.

The Jumbo Original is not the only new corner-cleaning brush in the Drillbrush family; as the Cone-shaped Corner brush is here to handle the tightest of angles.

The Corner brush has uniquely trimmed 1 inch to 2 inch (2.54cm to 5.08cm) bristles that form a sloped surface and comes to a point in the center of the brush.

This wedge-like shape minimizes the space between the bristles and the wall, making sure you don't miss any dirt.

The Corner brush is great for scrubbing hard-to-reach stains along backsplashes, shower grout, rims, and siding.

Additionally, the lower stiffness variants of the brush see the bristles flay out at higher speeds, forming a wheel-like shape that can scrub grout lines and grooved surfaces similar to an Edge brush.

The Corner brush is available on its own and as a part of the 4CO kit. It is also featured in our new 21-piece brush and pad combo kit (See Page 44.)

Medium Yellow Corner brush scrubbing the back corner of a bath tub.

1 IN. BRUSHES & KITS

The 1 inch brush is a detail brush with a focus on cleaning lugnuts and small intricate objects. With the longest bristles of any Drillbrush, you'll have no trouble getting into tight areas.

The world of Drillbrush detailing has been dominated by the 2 inch brushes, but the 1 inch Long brush brings something different to the table.

This brush features 2.5 inch (6.35cm) long bristles, the longest of any Drillbrush product. These bristles are very flexible and can work their way in and around tight spaces, small objects, and into intricate detailing.

It is a modern redesign of the old Drillbrush lug nut brush, which means scrubbing lug nuts is still it's forte. However, it is also handy for scrubbing inside jars and glassware, cleaning out ornate designwork on wooden furniture, and even doing some scrubbing in grout lines and grooves.

The 1 inch Long brush is sold as a single brush and as part of the EES-1L kit, which features two Edge brushes to make for the ultimate detailing and grout cleaning experience.

- 4-piece brush kit featuring a 2 inch Short, 4 inch, 5 inch, and Original brush, as well as a 7 inch extension.
- All brushes feature a 1/4" quickchange shaft for use in all cordless drills and impact drivers.
- Original brush cleans corners and contoured surfaces. 4 inch and 5 inch Flat brushes are for cleaning flat surfaces. 2 inch Short brush is built for spot cleaning and detailing.
- 7 inch extension accepts all brushes and assists in cleaning hard-to-reach surfaces. [see Page 46]
- Available in Soft White, Medium Yellow, Green, and Blue, Stiff Red, and Ultra Stiff Black.

2M & 2LMS KITS

2M and 2L-MS are 2-piece brush kits that feature a Mini Original corner brush with a detail brush. These kits are great for detailing and small-scale cleaning.

2M BRUSH COMBO KITS

\$14.95

- 2-piece brush kit featuring a 2 inch Short and Mini Original brush.
- All brushes feature a 1/4" quickchange shaft for use in all cordless drills and impact drivers.
- Mini Original brush cleans corners and contoured surfaces.
- 2 inch Short brush is built for spot cleaning and detailing.
- Available in Soft White, Medium Yellow, Green, and Blue, Stiff Red, and Ultra Stiff Black.

MS-2L BRUSH COMBO KITS

\$14.99

- 2-piece brush kit featuring a 2 inch Long and Mini Original brush.
- All brushes feature a 1/4" quickchange shaft for use in all cordless drills and impact drivers.
- Mini Original brush cleans corners and contoured surfaces.
- 2 inch Long brush is built for spot cleaning and detailing.
- Available in Soft White, Medium Yellow, Green, and Blue, Stiff Red, and Ultra Stiff Black.

40 KITS

Drillbrush 40 kits are a simple, but effective Drillbrush kit. Featuring an Original and a 4 inch flat brush, it's perfect for the cleaner who only wants the essentials. The 40 kit is also available with a 5 inch extension.

40 BRUSH COMBO KITS

\$16.95

- 2-piece brush kit featuring a 4 inch and Original brush.
- All brushes feature a 1/4" quickchange shaft for use in all cordless drills and impact drivers.
- Original brush cleans corners and contoured surfaces.
- 4 inch Flat brush is for cleaning flat surfaces.
- Available in Soft White, Medium Yellow, Green, and Blue, Stiff Red, and Ultra Stiff Black.

40-5X BRUSH COMBO KITS

\$20.95

- 2-piece brush kit featuring a 4 inch and Original brush, as well as a 5 inch extension.
- All brushes feature a 1/4" quickchange shaft for use in all cordless drills and impact drivers.
- Original brush cleans corners and contoured surfaces.
- 4 inch Flat brush is for cleaning flat surfaces.
- 5 inch extensions accepts all brushes and assists in cleaning hard-to-reach surfaces. [see page 46]
- Available in Soft White, Medium Yellow, Green, and Blue, Stiff Red, and Ultra Stiff Black.

Much like the 40 kit, the 4M kit features one flat brush and one corner brush, this time substituting the Original for a Mini Original. This kit is great for compact cleaning jobs. The 4M kit is also available with a 5 inch extension.

Stiff Red 4 inch Drillbrush scrubbing deck stairs.

SCRUBBING PADS

Brushes aren't the only way to get surfaces clean. Drillbrush offers a line of scrubbing pads for all of your buffing and polishing needs. Below are descriptions of all the scrub pads we currently sell and a chart listing which kits the pads are available in.

4 INCH FOAM SCRUBBING PADS

Foam pads are the softest scrubbing pad we produce. Unlike the other pads, the foam pad is made from a spongy material that is perfect for glass surfaces, such as windshields and mirrors.

The Foam pad can be found as part of the Drillbrush 21-piece and 38-piece kits.

4 INCH SOFT WHITE SCRUBBING PADS

Drillbrush 4 inch White pads are the softest non-foam pad. The mesh material is perfect for everyday polishing on delicate surfaces, such as wood furniture, mirrors, windows, and shower doors.

This pad is available in the 420-WRB and 21-piece pad brush kits.

4 INCH SOFT ORANGE SCRUBBING PADS

The Drillbrush 4 inch Soft Orange pad is the same stiffness as the White pad. As such, everything the White pad can do, from polishing to delicate surface scrubbing, is within the Orange pad's purview.

The Orange pad is unique to the 38-piece kit.

4 INCH MODERATE WINE RED SCRUBBING PADS

The Wine Red pad is a half-step between the Soft pads and Medium pads. It's great for general purpose jobs that require a little extra coarseness to scrub properly.

This pad is only available in the 38-piece kit.

Drillbrush 4 inch Foam pad scrubbing a windshield.

4 INCH MEDIUM BLUE SCRUBBING PADS

The 4 inch Medium Blue pad is a general purpose scrubbing pad that can be used on most household surfaces. It shines when cleaning porcelain, fiberglass, vinyl, and plastic.

This pad can be found in the 420-WRB and 21-piece pad brush kits.

4 INCH MEDIUM GRAY SCRUBBING PADS

Gray pads have the same stiffness as the Blue pads, making them just as effective for general purpose scrubbing in bathrooms, kitchens, and more!

The Gray pad can only be found in the 38-piece kit.

4 INCH STIFF RED SCRUBBING PADS

Stiff Red pads are best suited for more difficult tasks, like scrubbing stainless steel, cookware, and surfaces plagued by baked-on messes.

Stiff Red pads are included as part of the 420-WRB and 21-piece pad brush kits.

4 INCH ABRASIVE GREEN SCRUBBING PADS

Abrasive Green pads are the stiffest pad we sell. Their tough nature helps clean grill surfaces, masonry, and steel.

The Green pad can be found in the 38-piece kit.

Drillbrush 4 inch Stiff Red pad scrubbing the walls of a kitchen sink.

PAD-BRUSH KITS

Get the best of both worlds with Brush and Pad combo kits! With a healthy assortment of brushes and pads, you can tackle any cleaning task that presents itself. New this year are the massive 21 and 38 piece brush and Pad Kits.

Y-S-420-QC-DB-40Z-DT \$21.95

A collection of commonly asked questions about Drillbrush products and services, curated from the many phone and email conversations we've had in our fifteen year history. Have any questions that aren't featured here? Send us an email at info@drillbrush.com

Q: IS THE DRILL INCLUDED?

A: No. The drill is NOT included.

Q: CAN I USE A DRILLBRUSH IN A CORDED DRILL?

A: No. The high torque may be too much for the brushes to handle and using a corded drill with water-based cleaners may pose an electrocution hazard.

Q: CAN I USE DRILLBRUSH PRODUCTS IN DREMELS AND ANGLE GRINDERS?

A: No. Doing so would be dangerous and would damage your Drillbrush product.

Q: WHAT DRILLS ARE DRILLBRUSH PRODUCTS COMPATIBLE WITH?

A: All brushes with a quick change shaft fit in all impact drivers and 3/8" cordless drills. For other shaft types, view the Shaft Guide on page 5.

Q: ARE DRILLBRUSH PRODUCTS GURANTEED?

A: All Drillbrush Products have a 90 day no questions asked money back guarantee. If you are not completely satisfied with our product we will issue a full refund or ship out a replacement at the buyer's request.

Q: DO YOU ACCEPT CREDIT CARD PAYMENTS OVER THE PHONE?

A: We do not accept credit card payments over the phone as it is insecure and puts your information at risk. However, we accept all major credit cards and PayPal through our secure website checkout.

Q: IS DRILLBRUSH AVAILABLE AT LOCAL RETIALERS?

A: Yes. While we are primarily an e-commerce business, we are currently available in select Ace Hardare, True Value, and Meijer stores. For a list of locations, visit www.drillbrush.com/united-states. For additional information, see page 50.

Q: DO YOU SHIP OUTSIDE THE UNITED STATES?

A: Yes. We ship to most countries through our website. If you are ordering from Drillbrush.com, go to drillbrush.com/international to view all available shipping zones. We are also available on international Amazon sites. View the availability chart (see graph above) to see where we are carried.

Same Stiffness

The black bristles on Original-style brushes are the same stiffness as the base color.

Q: HOW MUCH DO YOU CHARGE TO SHIP?

A: Shipping is \$4.95 for all orders in the United States. For international shipping, use the shipping calculator at checkout on our website.

Q: DOES THE COLORING ON THE BRISTLES COME OFF?

A: No. The color is infused with the fiber, it will not wear off.

Q: ARE THE BLACK BRISTLES ON THE ORIGINAL AND MINI BRUSHES A DIFFERENT STIFFNESS FROM THE REST OF THE BRUSH?

A: The black bristles are the same stiffness as the rest of the brush (pictured left).

Q: WHAT IS THE DIFFERENCE BETWEEN THE THREE MEDIUM BRUSHES?

A: They are the same stiffness, but are colored differently and given different applications to prevent cross contamination. This way, a brush used in bathrooms is not used in a kitchen near food.

Drillbrush is easy to use, but there are advanced strategies and you can employ to increase the life of your brush and clean more effectively. Below is a selection of our most common advice and techniques.

Stiff 5 inch Red Flat brush in a Close Quarters Drill scrubbing metal siding.

- If you are uncertain on which brush to use for a certain application, refer to our color chart (see Page 4).
- To increase the longevity of your brush, periodically switch between forward and reverse on your drill. This will keep your bristles from bending and help your more effectively.

Medium Green Original Drillbrush in a 7 inch extension cleaning a coffee pot.

- Brushes are more durable than pads, but pads are better for polishing and smooth surfaces.
- If you are cleaning something that is submerged or tough to reach, use an extension (see page 46) to help give you that extra reach.
- To remove pet hair from furniture and clothes easily, use an original brush at a low drill-speed. NOTE: Do not use cleaning solutions when cleaning pet hair.
- To lessen the amount of splatter when cleaning, use less liquid, create a cleaning paste, or use the brush at a slower speed.
- Use a close-quarters drill on flat surfaces to have better drill control. (pictured above)
- If your Drillbrush comes in a box or blister pack you can save the packaging and use it as a storage container for your brushes. This will protect you brushes from being crushed or misplaced when not in use.
- It is recommended you clean with the sides of the Original and Mini brushes, as it will allow you to clean larger surfaces. The nose of the brush is good for tasks such as drains or corners.

In addition to our website, Drillbrush products are also available on a variety of other online marketplaces, which is perfect for the digital shopper who has their preferred sites to order from. Browse our list of store fronts below.

Top of a Drillbrush 5 inch brush. "Useful Products" branding is highlighted white in this example.

Drillbrush products have been the target of knock-offs and counterfeits posing as the real thing. By ordering through our website, drillbrush.com, or one of our official seller pages, you can avoid fraudulent listings. However, if you're uncertain of a product's legitimacy, there are a few ways you can help verify its authenticity.

Authentic Drillbrush products feature the words "Useful Products" embossed on the block of the brush (pictured left), as well as safety disclaimers and recommended RPM. Smaller brushes may just say "Useful Products" or "Drillbrush."

Drillbrush Original, Mini, and Jumbo brushes come with a sticker wrapped around the block that says "Drillbrush.com." The sticker is yellow on the Original brush, green on the Mini brush, and black on the Jumbo brush.

Some official Drillbrush packaging features a unique Transparency ID on the back of the box. Customers can check the authenticity of their product by scanning the code with the Transparency app or the Amazon app on their smartphone or mobile device.

For more information visit: www.drillbrush.com/genuine-drillbrush
