# Speed Control Customization

**14**   Click on the Speed Controller menu
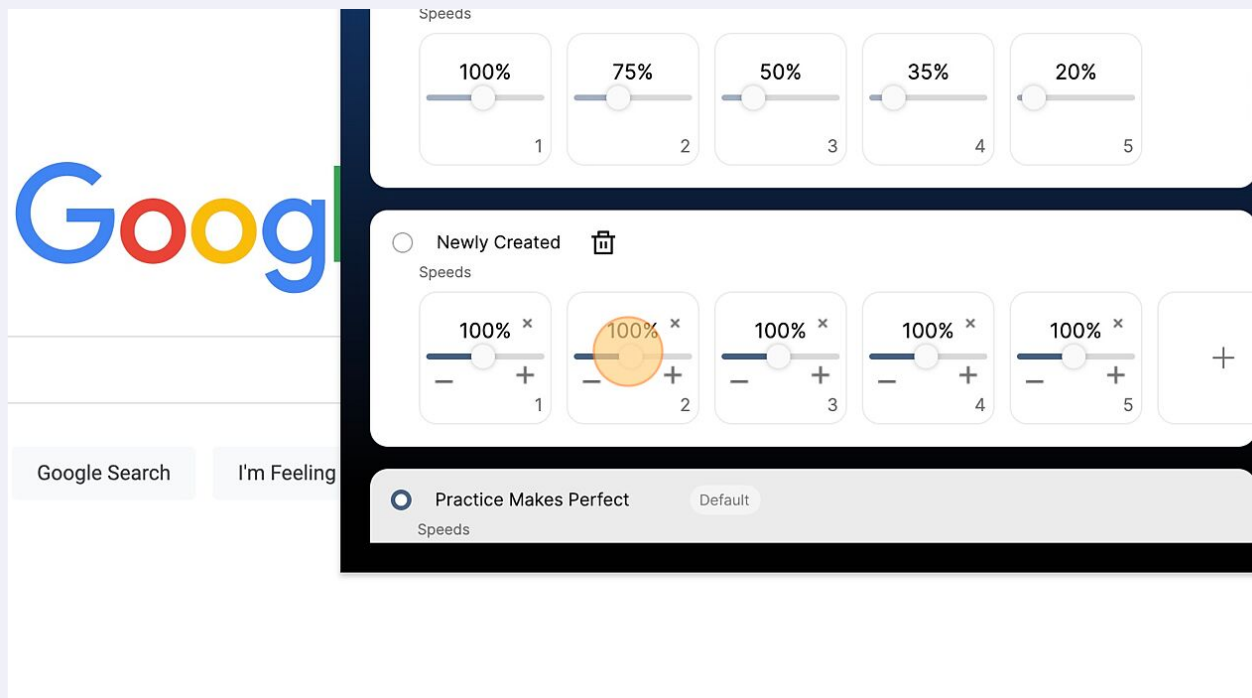

15 Select a Speed Control preset...

16 ...or press the "Add Preset" to create your own custom speed preset.
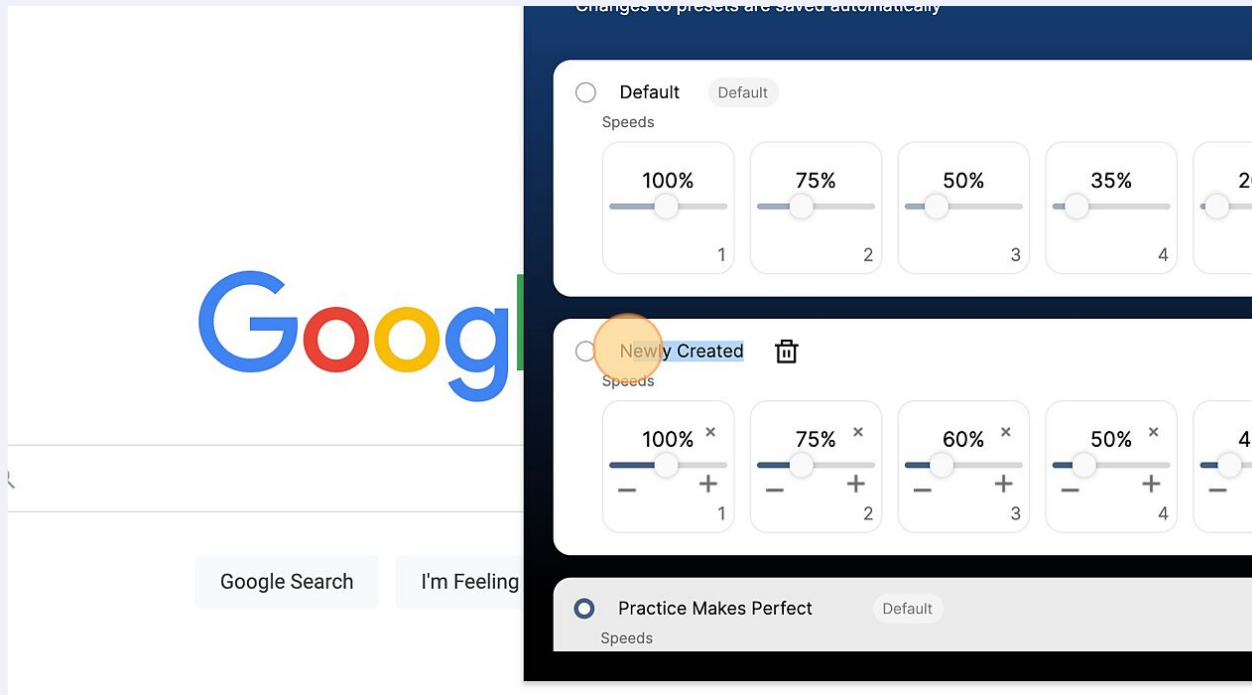

17   Click the plus sign to add as many speed settings to your preset as you'd like

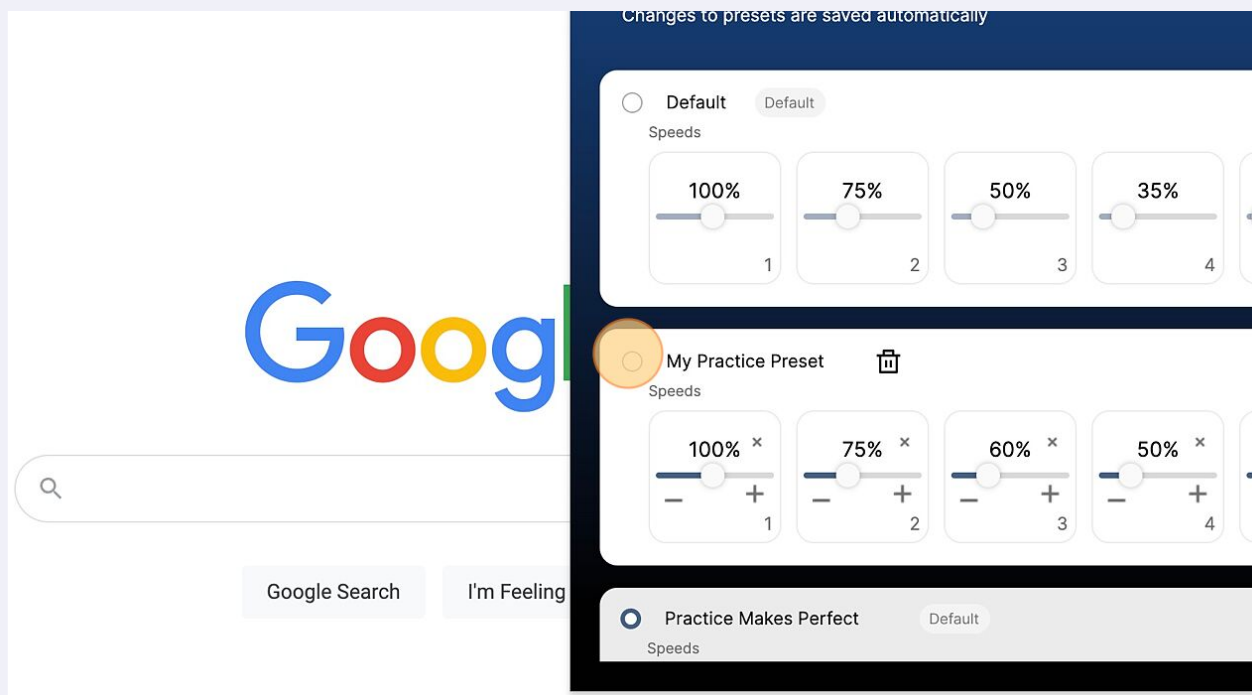

18   Adjust each speed setting in your preset using the slider or plus & minus signs.

19
Click here to rename your custom preset

Changes to presets are saved automatically

◯ Default   Default

Google Search   I'm Feeling

> **Tip!**
> You can create, edit, rename, and delete your custom-made presets, or choose another preset.
> But you must always "Reload" the page you are actively working on before any preset changes take effect

21 Click the Reload button in order for the new speed preset to take effect

Best of luck on your musical journey, we hope these new tools help you along the way!
