# Vidami Control Center - Safari Guide

1   Click the Vidami pop up button to open the Vidami Control Center

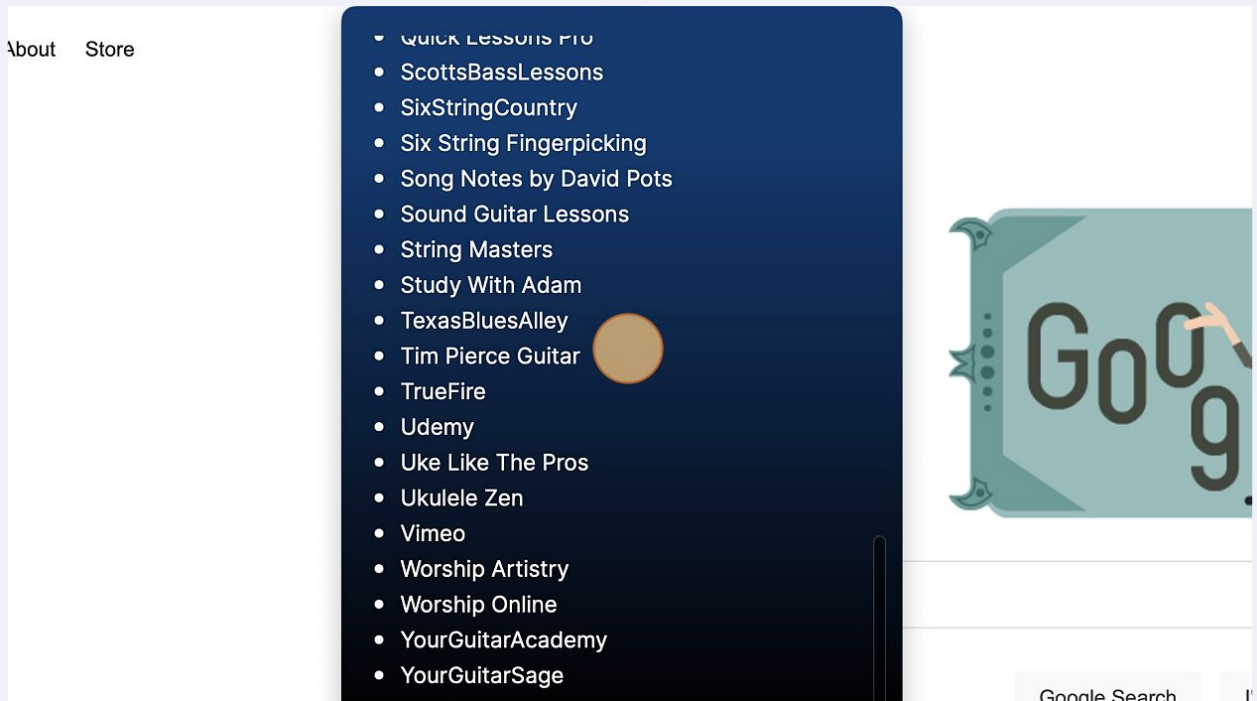

Online Video Control

**2** Click on the Online Video menu...

3 ...and easily search and navigate to any of Vidami's 60 plus compatible websites and learning platforms
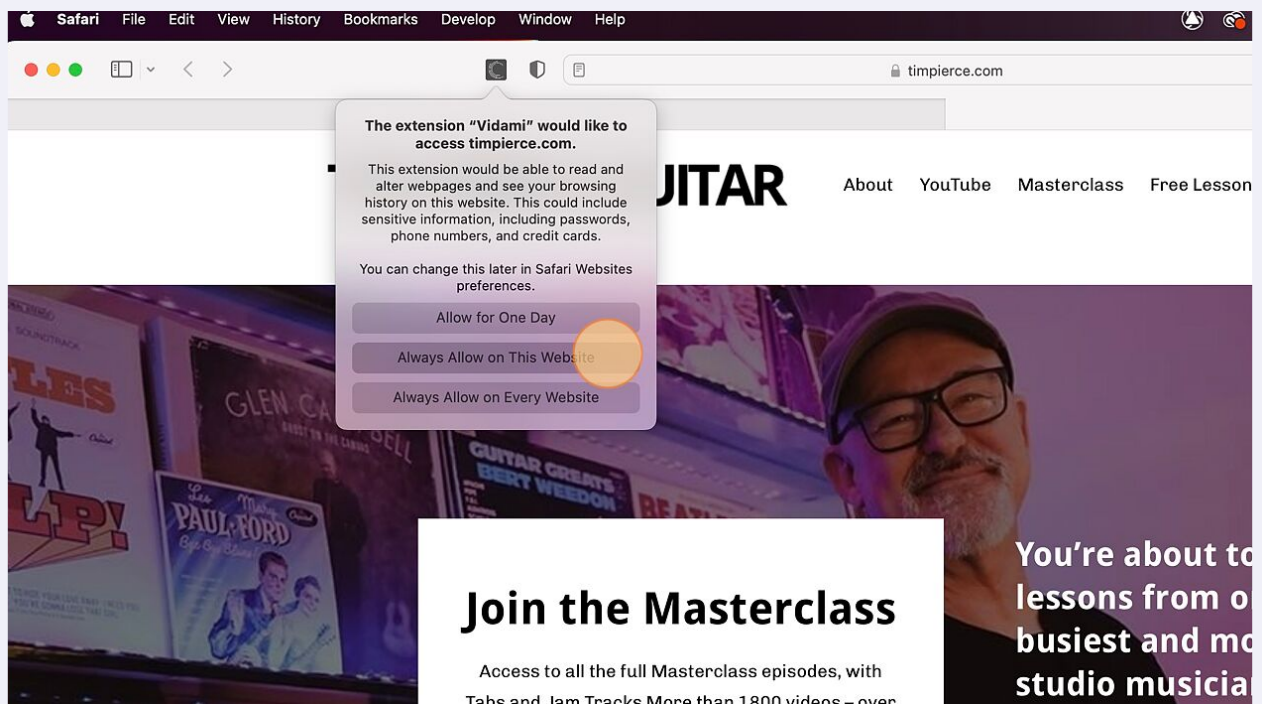

4 Important: If you have not already set the Permissions for one of the Vidami compatible websites, the Vidami pop up will be gray...

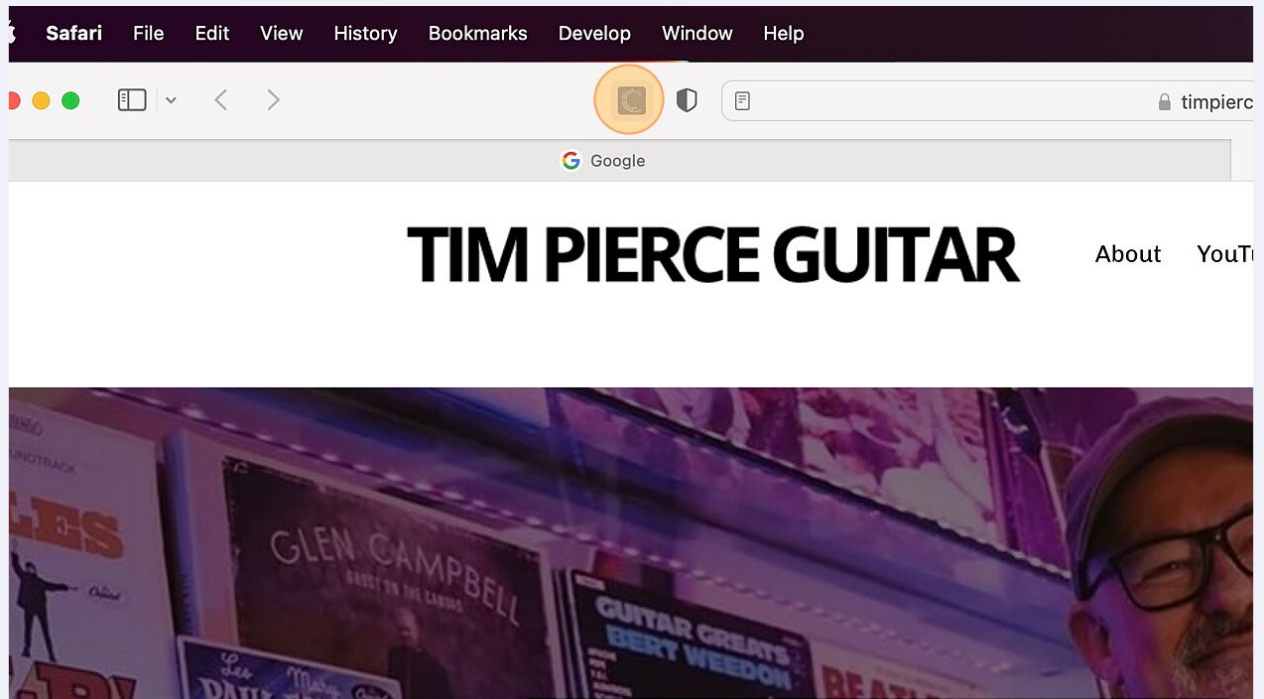

5 ...first click the pop up button again and choose one of the first two Permissions options for the current website - Or - allow permission for use of the Vidami extension on all Vidami compatible websites by selecting the third option
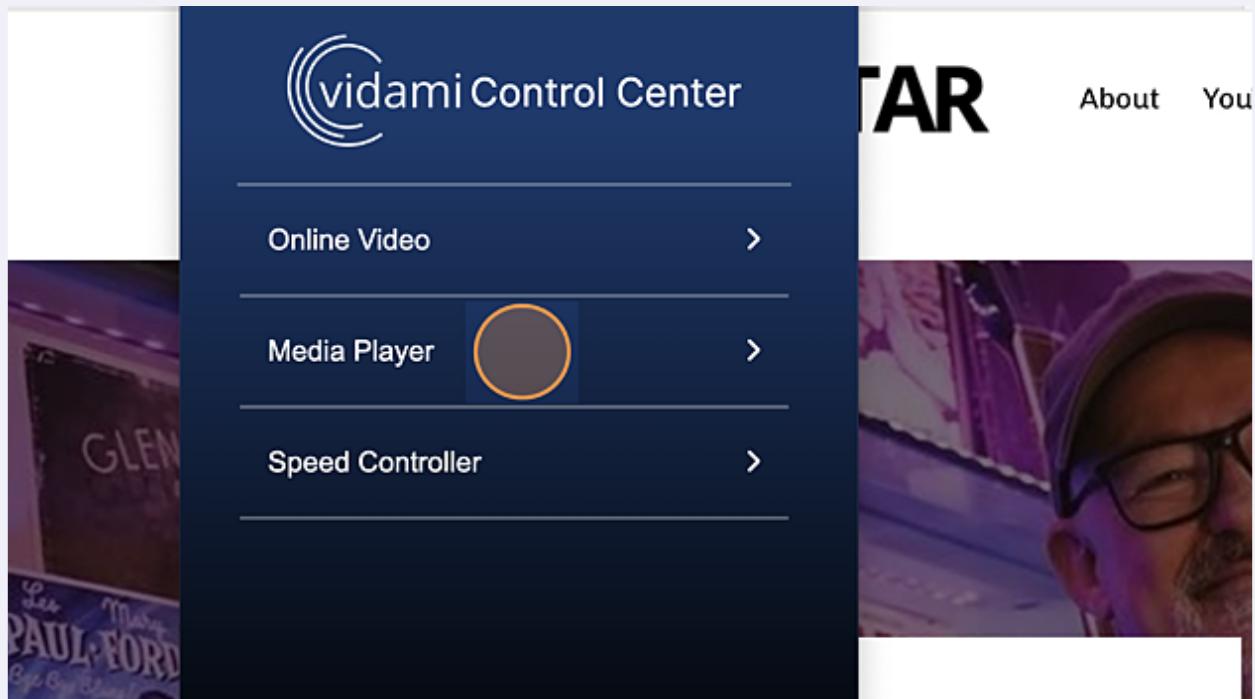

6 Notice that once you have checked one of the permission options, the Vidami popup button turns blue

18 Click the plus sign to add as many speed settings to your preset as you'd like

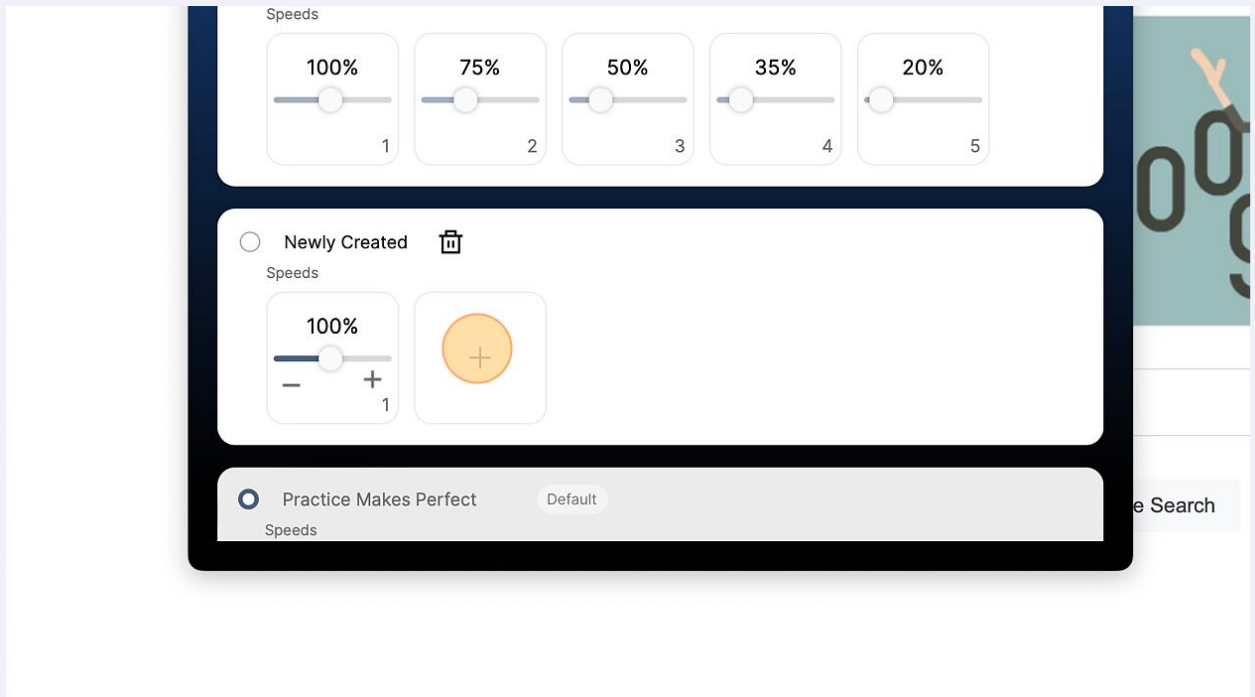

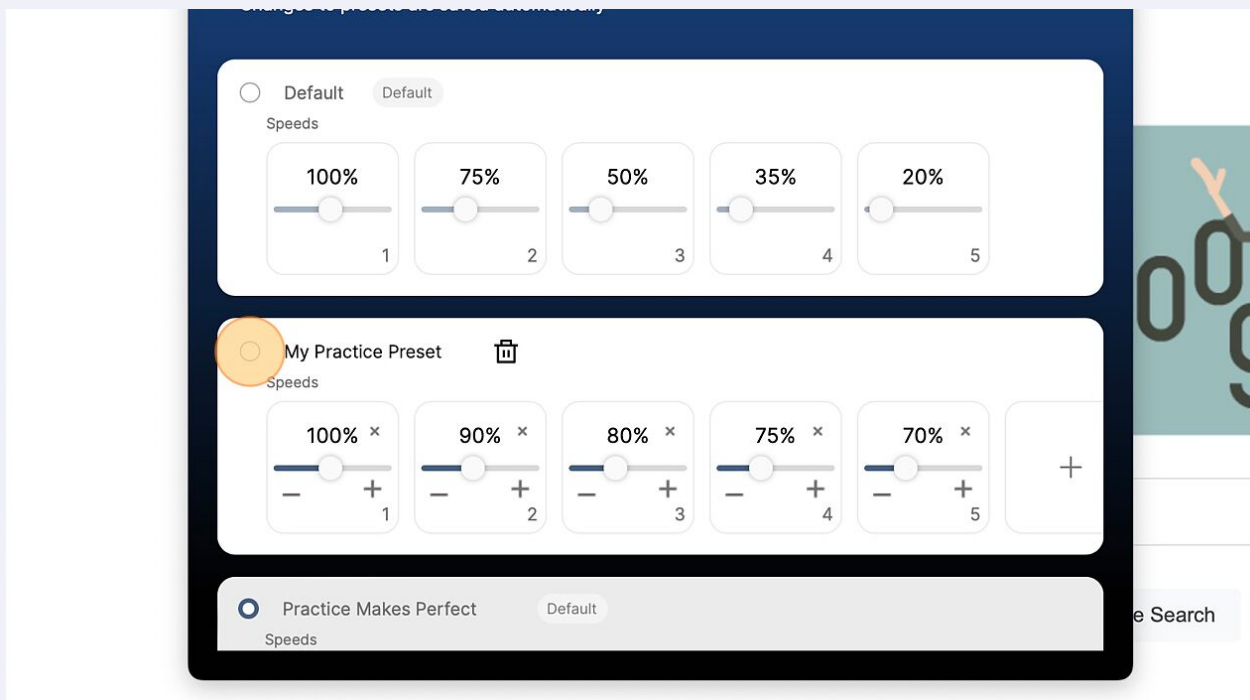

19 Adjust each speed setting in your preset using the slider or plus & minus signs
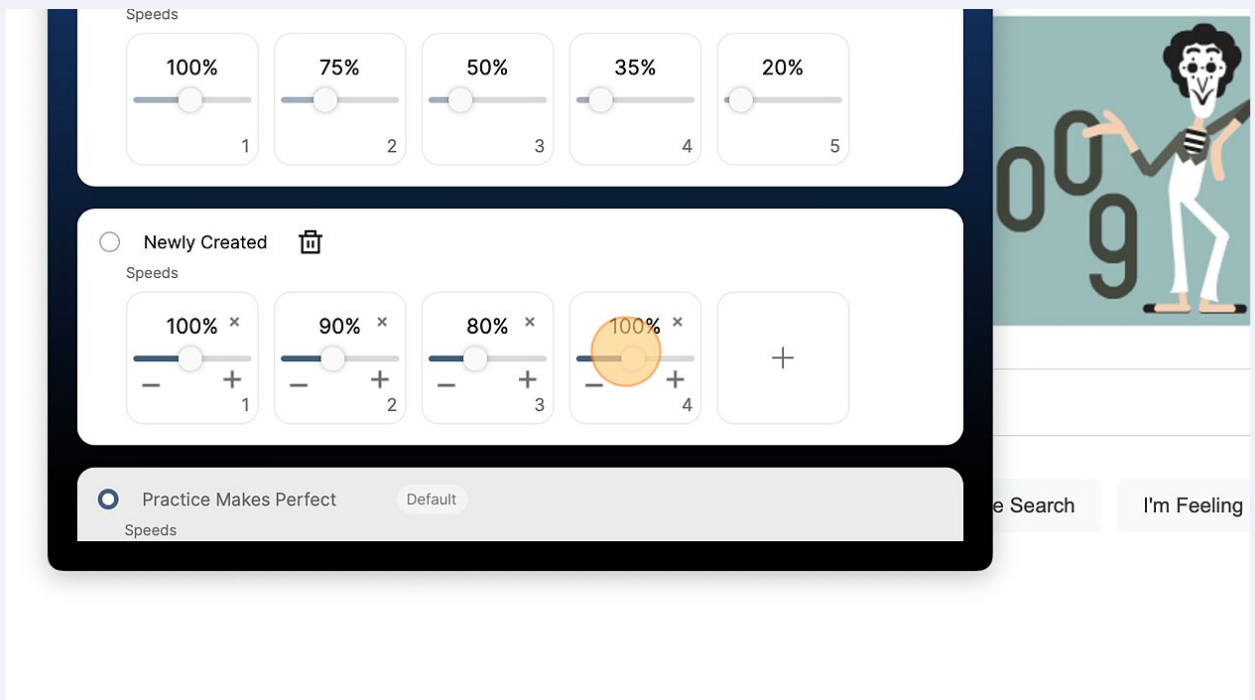

20   Click here to rename your custom preset

21   Click the radio button next to your new preset to select it as the active speed preset
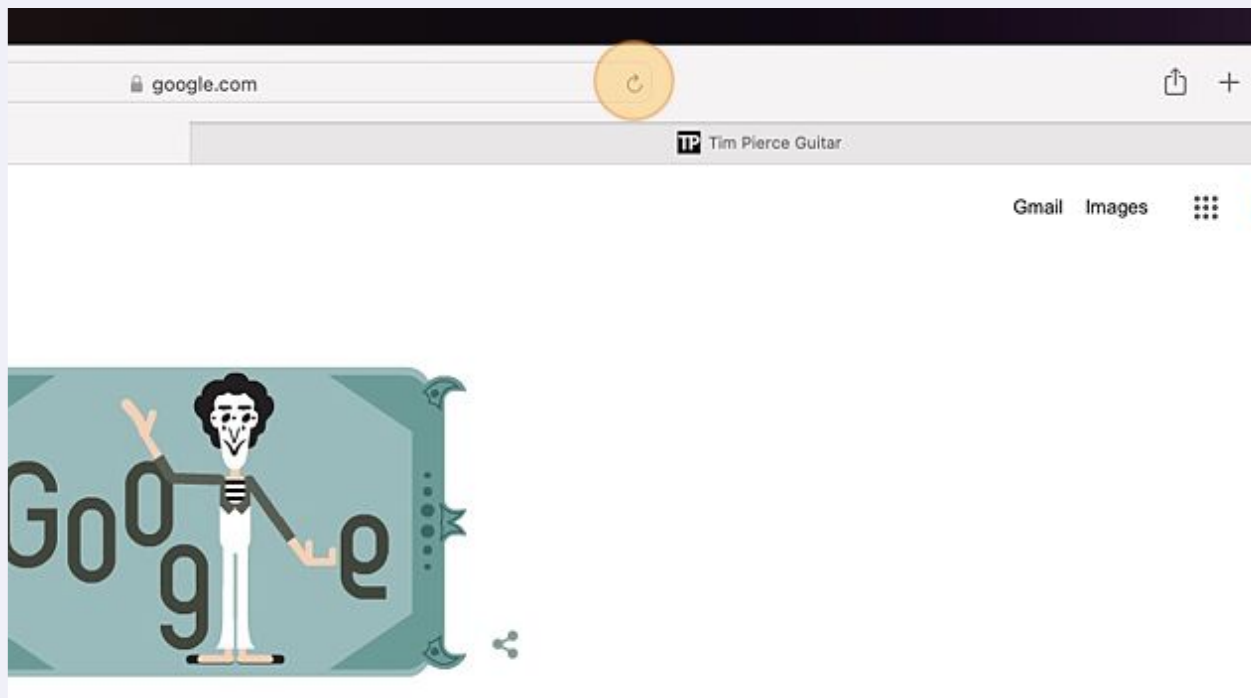

> **Tip!**
> You can create, edit, rename, and delete your custom-made presets, or choose another preset.
> But you must always "Reload" the page you are actively working on before any preset changes take effect

22 Click the "Reload" button in order for the new speed preset to take effect

Best of luck on your musical journey, we hope these new tools help you along the way!
