

2P Battery Module 7942 (Red)

MPI

Made with Genuine Dean's Ultra Connectors
Engineered to handle the same high current as the
Dean's Ultra connectors are known for.

Caution: Battery and ESC connections must follow standard convention, Battery Female Dean's and ESC Male Dean's.

7932 - Dean's Ultra "Y" Module (Red),

Use to connect two ESCs to one battery.

7942 - 2P Battery Module (Red), for two packs in parallel.

Use to increase current and duration.

7952 - 2S Battery Module (Black), for two packs in series.

Use to increase the total voltage.

7953 - 3S Battery Module (Black), for three packs in series.

Use to increase the total voltage.

Caution: All batteries **MUST** be identical, same brand, "C" and mAh rating. Batteries must be fully charged before connecting. Do not charge while connected.
