

OFF THE GRID

ELECTRICITY GENERATING SPINNING BIKES

FOR

About us

We offer more than a bike. It is a tool for you to create the best experience in a corporate gym and share your sustainable values with your employees to increase your employer brand.

Our bikes

Our eco-friendly spin bikes convert users' energy into electricity. The electricity is reinjected directly back into the grid, reducing the building's energy consumption in real time..

How it works:

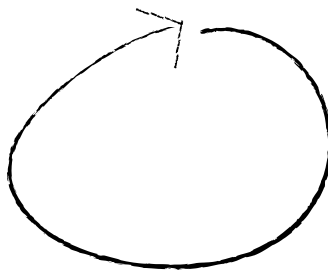

1 TRAINING

User trains as he would on any spin bike.

4 REDUCTION

The electricity fed in the grid reduces energy consumption in real-time

2 CONVERSION

Our technology transforms the generated energy into electricity

3 BACK TO THE GRID

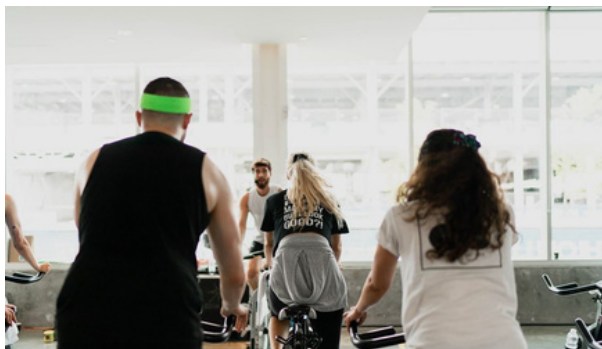

The inverter synchronizes the electricity, allowing it to be fed back directly into the electric grid without modification.

Our solutions

Give your staff the environment they deserve!

Data-driven

Get access to the data from the bike to measure the impact it had on the environment and on the health of your employees. We provide custom reports for free.

Added value for everyone!

Motivate everyone in your team to compete, workout and engage in a healthy lifestyle. We offer a unique and personalized solution for corporate wellness.

Employee engagement

It is an easy way to engage your employees in your sustainability policy with a new and concert initiative. The work environment and the organization's commitment to sustainable development are the most important attractions for more than 40% of millennials.

Benefits

Opting for Off The Grid is making an enlightened choice. Discover all the advantages of buying Off The Grid bikes!

LOCAL PRODUCT

Built and conceived in Canada
Carbon footprint reduced by 75%

ECO-FRIENDLY

Awareness and electricity production.
The product with the lowest ecological
impact in the fitness industry.

INNOVATIVE

Connected fitness equipment,
gamification opportunities and
challenges.

STYLE

Modern and sleek design.
