

OFF THE GRID

ELECTRICITY GENERATING SPINNING BIKES

OFF THE GRID

About us

At Off The Grid, we believe that fitness is an untapped source of energy. We started the company with a specific goal in mind:

REDUCE THE ECOLOGICAL FOOTPRINT OF EACH WORKOUT!

Our bikes

Our eco-friendly spin bikes convert users' energy into electricity. The electricity is reinjected directly back into the grid, reducing the building's energy consumption in real time..

How it works:

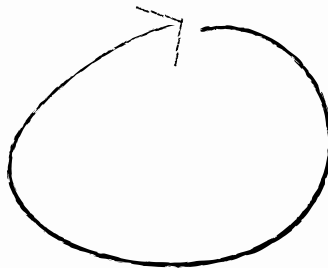

1 TRAINING

User trains as he would on any spin bike.

4 REDUCTION

The electricity fed in the grid reduces energy consumption in real-time

2 CONVERSION

Our technology transforms the generated energy into electricity

3 BACK TO THE GRID

The inverter synchronizes the electricity, allowing it to be fed back directly into the electric grid without modification.

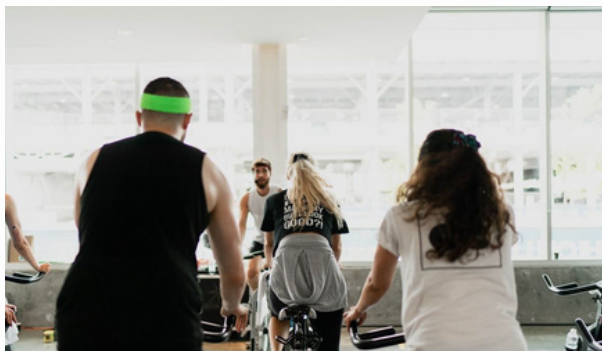

Our solutions

Give your students the environment they deserve!

Friendly and fun competitions.

After all, isn't that the best way to strengthen the bonds between students ?

With the Off The Grid bikes, team building has never been easier! Challenge your sport teams: which team will manage to generate the most electricity?

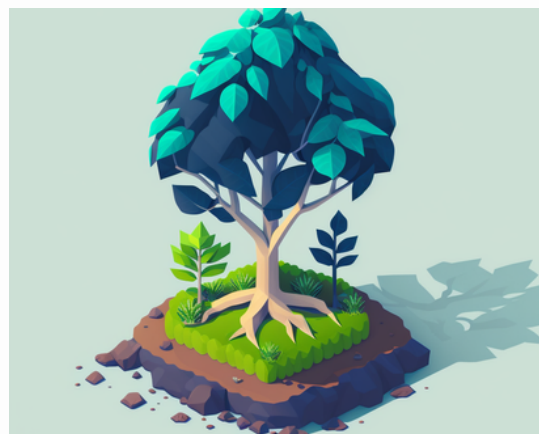

Added value for everyone!

Motivate everyone at school to compete, workout and engage in a healthy lifestyle.

Eco-friendly citizens.

Our spin bikes combine healthy lifestyle habits along with eco-responsible knowledge. It's an engaging way to make the students and athletes more aware of their energy consumption!

Benefits

Opting for Off The Grid is making an enlightened choice. Discover all the advantages of buying Off The Grid bikes!

LOCAL PRODUCT

Built and conceived in Canada
Carbon footprint reduced by 75%

ECO-FRIENDLY

Awareness and electricity production.
The product with the lowest ecological
impact in the fitness industry.

INNOVATIVE

Connected fitness equipment,
gamification opportunities and
challenges.

STYLE

Modern and sleek design.
