

Telis 16 RTS

Centralised control made simple

Intuitive programming and an easy to understand interface...

Telis 16 RTS

The comfort of centralised control.

The new Telis 16 RTS remote control with its 16 channels, can control all Somfy RTS home applications, including interior/exterior blinds, awnings, roller shutters, curtains, etc.

New:

Intuitive programming and an easy-to-use interface:

- > The remote control is easy to use.
- > The end user can modify the display themselves, as and when required to suit their needs.

EXCLUSIVE TO SOMFY

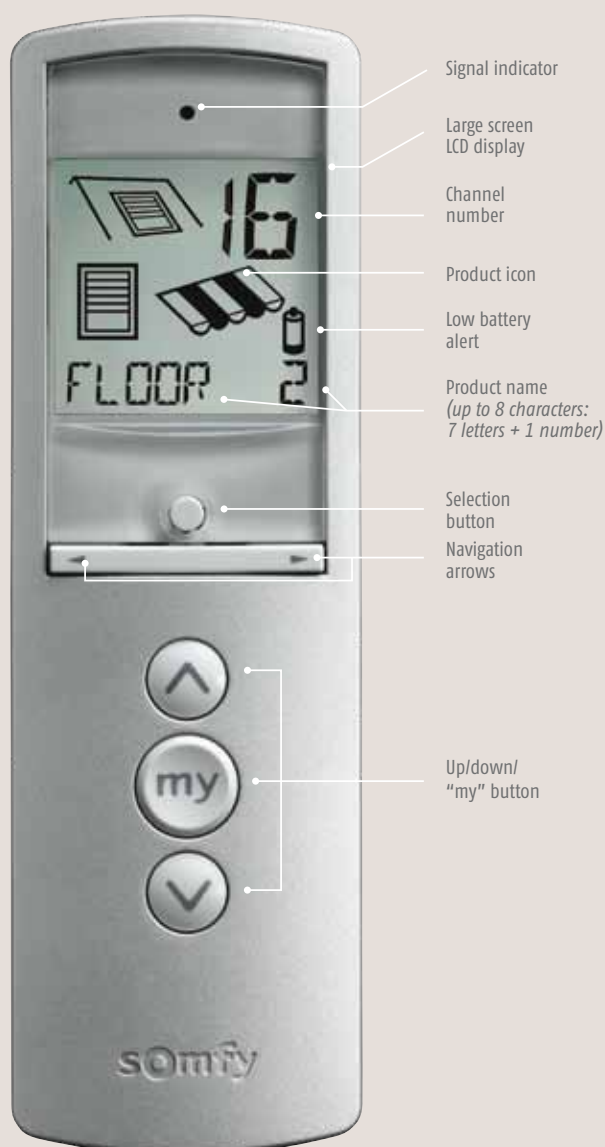

> The "my" button

Use this button to set your favourite position for a product group and recall it again instantly.

A Clearer vision

A large screen, detailing all information, which can be read comfortably. You can assign each channel a name, icon and/or number.

What does it look like?

E.g.: The screen in the office

E.g.: The roller shutters on the first floor

E.g.: The awning on the roof balcony

E.g.: All products in the house

Easier programming

> Create up to 16 groups:

- > Either multiple Somfy motors in the same room or several end products on the same façade, operated from a single remote.
- > Or a single RTS application, to be operated on its own.

How does it work?

Creating a group couldn't be easier. The same copy-and-paste procedure for other multi-channel RTS control units works with the Telis 16 RTS.

Greater customisation

Once you have created a group of products, you can view and name the group with a few simple clicks, making the group easier to identify on the remote control screen.

> Harmony

A choice of two finishes to match all décors.

Pure
A subtle tone that blends seamlessly into all interiors.

Silver
For modern interiors bursting with technology.
