Quick guide to WSER Universal series programming
If more information is required, refer to the original instructions.

All sequences must be completed within 10 seconds

Assigning a remote to a motor **(Always make sure the remote is on the correct channel first)**

Method 1. (Does not apply to DC Battery motors) Apply power to the motor (motor will jiggle), Press up and down together and release, press stop once (motor will jiggle if successful). <u>Only</u> <u>works for first remote assigned to motor.</u>

Method 2. Press and release (<u>Do not</u> hold down) the button on motor head (motor will jiggle), Press up and down together and release, press stop once (motor will jiggle if successful). <u>This</u> <u>method will work anytime</u>

Method 3. (Must already have a remote assigned). Using an original working remote, Press up and down together and release, press stop 8 times (motor will jiggle if successful), then pick up second remote and Press up and down together and release, press stop once (motor will jiggle if successful). The extra remote (or channel) is now assigned.

Changing the motors direction
