

Support Your Mouth AND the Environment

BrushEco

The first **bamboo** Bass-style toothbrush! It's on a mission to:

Create healthier mouths

Reduce **new** plastic pollution

Clean up **existing** plastic pollution*

*We donate 100% of BrushEco profits to ocean cleanup organizations.

"Best toothbrushes ever... after using them, I immediately bought more... my teeth are cleaner than ever. The wooden handles are so much better than plastic!"

Wandalea W. from HI

[See how it works!](#)

What's different about Bass toothbrushes?

- Medium firmness bristles more effectively clear away plaque & bacteria.
- Rounded, polished bristle tips gently massage.
- Shorter handle encourages the user to grasp it in their fingertips & brush gently.

What are the features of the different BrushEco options?

Adult 3-row option:

- Spaced out bristle tufts.
- Great for cleaning along the gum line with the Bass Brushing Technique, cleaning between teeth with gaps, & cleaning around braces.

Adult 4-row & Junior 3-row options:

- Bristle tufts are closer together.
- Great for gently cleaning & polishing teeth.
- Junior size is helpful for smaller mouths & for brushing any hard-to-reach areas like behind the lower front teeth & the back molars.
