

- Element:** Golden Tube
- Body:** Extruded anodized aluminum
- Remote Control:** 3 power levels
- Warm Up Time:** 5-10 minutes
- IP Rating:** IP65

FEATURES AND BENEFITS

The Genesis Series heater is an entry level option. The electric heater is made of quality anodized aluminum, with an IP rating of IP65, these heaters offer an ideal solution for heating both sheltered and unsheltered outdoor spaces.

The Genesis models offer considerable flexibility when it comes to installation as they can be both ceiling and wall mounted and are easy to install. Wall/ceiling mounting brackets are provided. Mounting heights are between 7-9 feet.

Reliable and durable the Genesis models are remote controlled. The remote control allows you to function through three power levels.

Medium length infrared heat produced by the RADtec Genesis heaters models heats people directly, without heating the air in between, producing a warm, comfortable and gentle heat. The heaters take between 5 and 10 minutes to reach full power and up to 30 minutes to raise the temperature of objects in their path. You should expect a 10 to 15 degree difference between the ambient temperature and objects in the coverage area. The perfect solution for keeping warm on those chilly evenings outdoors or for heating up those hard to heat areas in large indoor spaces such as sun rooms. The golden tube heating elements are rated to work for 5,000 to 8,000hrs. Silent in operation these efficient, and environmentally friendly heaters are a great way to ensure clean, comfortable and effective warmth.

Electrical Parameters / Product Dimensions / Coverage Area

Electrical Parameters

Model No.	Wattage(W)	Amperage(A)	Voltage(V)	Wire Length(in)
G15R	1500	13.6	110-120	72
G30R	3000	13.6	220-240	72

Product Dimensions

Model No.	Dimensions (in)	Weight (lbs)
G15R	25 x 5 x 4	5
G30R	38 x 5 x 4	7

Coverage Area

Model No.	Indoors	Outdoor Enclosed	Outdoor Exposed
G15R	50ft ² ~ 4.6m ²	40ft ² ~ 3.7m ²	30ft ² ~ 2.8m ²
G30R	100ft ² ~ 9.3m ²	80ft ² ~ 7.4m ²	60ft ² ~ 5.6m ²

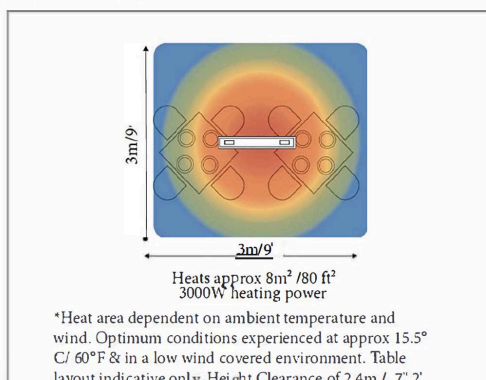

IMPORTANT

The recommended installation height of the Genesis Series is 2.1m to 2.7m (84"-108") from the floor. Under no circumstances is the heater to be installed at less than 1.8m (71") from the floor. In all cases it should be installed at a height where it cannot be touched in operation. The heated zones detailed are based on the recommended mounting heights.

The Genesis Series heaters are guaranteed against failure due to faulty materials or workmanship for one year from the date of purchase. Warranty excludes remote control. In the unlikely event of failure of the unit within this time, the unit must be returned to the supplier for repair or replacement. Refer to the warranty policy on radtec.net for more details including exclusions. The guarantee is invalid if the correct installation instructions have not been adhered to.
