# Firmware Installation Guide
## (Updating from a USB disk)

XGIMI

1 Necessary Components

USB disk
(FAT32 Format)
PC

Projector
(Models support
firmware updates)

2 Update Steps:
How to perform a force brush

① Download the firmware via
the provided link from a PC
and copy it to any USB disk;
Note: (It should be formatted
to FAT32)

② Plug the USB disk into the
projector's USB 2.0 port;

USB2.0
USB2.0

③ With the projector in Off mode
(please don't turn on the projector),
long-press the "power" button on the
projector for 5-7 seconds, and
release it when you hear the fan
operating strongly.

④ You'll see an Android robot and a progress
bar; Then, the system will update
automatically.
