Rubrail Mounted LED Light Installation Instructions
(Part #'s: 69726SS, 69727-R & 69727-L)

PARTS/TOOLS NEEDED:

|			Butt Splices & Application Specific Sealant
Rubrail LIght	Mounting Screws	Power Drill (Not Provided)	Not Provided

INSTALLATION CONSIDERATIONS

• Disconnect power before installing, adding or changing any component.

• To avoid a hazard to children, account for all parts and destroy all packing materials.

• It is recommended that fuse protection be added to the positive (+) input.

• All electrical connections should be made inside an approved junction box.

• Ensure there is adequate support behind your light whether in the ceiling or on the wall before installing. Failure to install into proper backing will void the warranty.
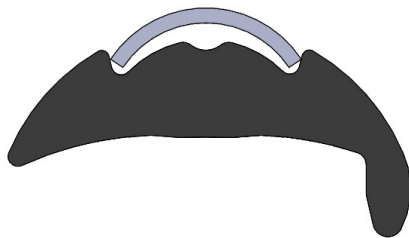

1. Determine the installation location drill hole for wires then align the light in the wire hole and use the light to mark screw holes. Drill appropiate sized holes for mounting screws.
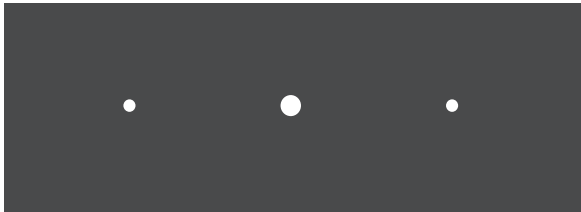

2. Follow the wiring diagram below to wire the light to your system.

Rubrail Light

To 12V DC Power

Black (-)   Red (+)   Black (-)

3. Feed the wires back through the hole and use application specific sealant around wire and screw holes. Fit lit into rubrail as pictured below then screw the light into place.
