

GMC Acadia 2008-2011

PART NUMBER: CV-55-08-G3

PLEASE READ COMPLETE INSTRUCTIONS BEFORE INSTALLING THIS VSM G3

All instructions assume a drivers seat vantage point. Caution is advised when removing and reassembling wood or plastic parts of a dash. Applying unnecessary force or pressure may cause a piece to crack or break.

When properly installed, the metal between the ball and 2 small holes is all that is exposed.
(Some exceptions apply).

TOOLS REQUIRED: Dash Trim Removal Tool (DTRT), 5/64" drill bit and drill, marking pen, phillips screw driver

PARTS INCLUDED: VSM G3, A Plate, J Stem, two # 8 x 1/2" screws

LOCATION: Right of climate control

STEP 1. Remove the bezel that surrounds the radio. Begin by inserting the dash trim tool (DTT) between the dash molding and trim bezel starting at the upper right hand corner. Insert the pointed end of the DTT, twist and gently pry the bezel from the dash, releasing the clips that secure the trim. Release all clips working in a counter clockwise direction. Place a protective cloth down on the console and allow bezel to rest to the side. Do not disconnect wiring from bezel.

STEP 2. Place the VSM G3 flush up against the dash as in picture two (2). Using a marking pen and the VSM G3 as a guide, mark the two pilot holes. With a 5/64" drill bit and drill, carefully drill the areas marked as the pilot holes and do not drill more than 1/4" deep.

STEP 3. Place the VSM G3 over the pilot holes and secure the VSM G3 in place using the two provided screws. After the VSM G3 is secured and in place, begin placing the dash back together in the reverse order in which it was dismantled. You have successfully installed your VSM G3!

Note: See the Assembly Instructions for G3 Components for additional information.
