 GMC Yukon 2007-2014

PART NUMBER: CV-71-07-G3

PLEASE READ COMPLETE INSTRUCTIONS BEFORE INSTALLING THIS VSM G3

All instructions assume a drivers seat vantage point. Caution is advised when removing and reassembling wood or plastic parts of a dash. Applying unnecessary force or pressure may cause a piece to crack or break.

**When properly installed, the metal between the ball and 2 small holes is all that is exposed.
 (Some exceptions apply).**

TOOLS REQUIRED: 5/64" drill bit and drill, # 2 Phillips screwdriver, Dash Trim Removal Tool (DTRT)

PARTS INCLUDED: VSM G3, three (3) # 10 x 1/2" screws, A Plate, J Stem

LOCATION: Right of Radio

STEP 1. Insert DTRT behind upper right corner of radio trim bezel (Photo #1). Pry gently to release retainer clip. Work tool clockwise around bezel releasing four (4) clips on right side and four (4) on left and one at bottom center. Lift bezel off and set aside.

STEP 2. Align the VSM G3 between the center retainer clips on the right side of the radio (Photo #2). Using the G3 as a guide, mark the location of three (3) screw holes. Set G3 aside. Drill three (3) pilot holes at the marked location using a 5/64" drill bit and drill. Align the G3 over the pilot holes, insert three (3) # 10 x 1/2" screws and tighten.

STEP 3. Re-assemble the dash in reverse order. This completes the installation of your VSM G3.

Note: See the Assembly Instructions for G3 Components for additional information.
