

Subaru Tribeca 2008-2009

CV-71-07-G3

PLEASE READ COMPLETE INSTRUCTIONS BEFORE INSTALLING THIS VSM G3

All instructions assume a drivers seat vantage point. Caution is advised when removing and reassembling wood or plastic parts of a dash. Applying unnecessary force or pressure may cause a piece to crack or break.

**When properly installed, the metal between the ball and 2 small holes is all that is exposed.
(Some exceptions apply).**

TOOLS REQUIRED: Dash Trim Removal Tool (DTRT), 5/64" bit and drill, Phillips Screwdriver, marking pen

PARTS INCLUDED: VSM G3, A Plate, J Stem, three (3) #8x1/2" screws

LOCATION: Right of Radio

STEP 1. Place the DTRT in the space between the dash molding and the trim piece that runs just above the glove box. See Photo #1. Use the DTRT in a gentle twisting motion to release the four (4) retaining clips that secure this trim piece to the dash molding. Set trim piece safely aside.

STEP 2. Place the VSM G3 in place as pictured in Photo #2. Make sure to have the VSM G3 fit as flush as possible in this corner as pictured. Next, use the VSM G3 as a guide and mark the location of the pilot holes with a marking pen. Use a 5/64" drill bit and drill out the marked locations drilling no more than a 1/4" deep. Place the VSM G3 over the pilot holes and secure it with the three (3) provided #8x1/2" screws, using a Phillips screw driver.

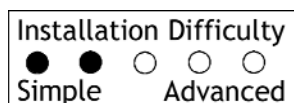

STEP 3. Once the VSM G3 is flush and in place, snap the trim piece back in place. You have successfully installed your VSM G3.

Note: See the Assembly Instructions for G3 Components for additional information.
