

Honda Pilot (2003-2008)

(Vehicles purchased in the United States only)

PART NUMBER: **HO-70-03**

PLEASE READ COMPLETE INSTRUCTIONS BEFORE INSTALLING THIS Pro.Fit VSM™.

All instructions assume a drivers seat vantage point. Caution is advised when removing and reassembling wood or plastic parts of a dash. Applying unnecessary force or pressure may cause a piece to crack or break.

Pro.Fit logo and part number will be right side up and readable when installed.

TOOLS REQUIRED: Hook tool, # 2 Phillips screwdriver.

PARTS INCLUDED: Pro.Fit VSM™, instructions.

LOCATION: Right of climate control.

NOTE: This installation requires extra care to prevent damage to the vehicle. The retainer clips pull out very hard when removing the dash bezel. Also, be careful when inserting the hook tool behind the dash bezel. The plastic is soft and scratches easily.

STEP 1. Begin by removing the small dash bezel to the right of the climate control. **(Photo # 1).** The bezel is held in place by three (3) retainer clips. Insert a hook tool behind the bezel in the upper right corner and pull firmly outward to release the first clip. Work the hook tool downward, releasing the final two (2) clips as you go. Set the bezel aside.

STEP 2. Locate and remove the factory, Phillips screw that was covered by the bezel. **(Photo # 1).** Align the Pro.Fit VSM™ over the centering pin and factory screw hole. Re-insert the factory screw and tighten. Replace the bezel, making sure that the retainer clips are secure.

This completes the installation of your Pro.Fit VSM™.
