

Lexus GX470 (2003-2006)

PART NUMBER: MV-50-03-L

PLEASE READ COMPLETE INSTRUCTIONS BEFORE INSTALLING THIS Pro.Fit Legend.

All instructions assume a drivers seat vantage point. Caution is advised when removing and reassembling wood or plastic parts of a dash. Applying unnecessary force or pressure may cause a piece to crack or break.

TOOLS REQUIRED: #2 Phillips screwdriver, drill and 5/64" bit, Dash trim removal tool (DM-40-22), 10mm

PARTS INCLUDED: nut driver, marking pen

Pro.Fit Legend, instructions, two (2) # 8 x 1/2" screws.

LOCATION: Right of climate control

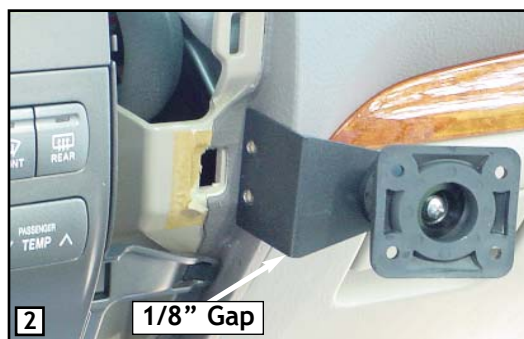

WARNING: Place a clean, protective cloth over the gear shift lever before starting this installation. Use extreme caution while working on this vehicle. It has wood grain panels that scratch very easily!

STEP 1. Start by removing the trim bezel right of the gear shift lever. Insert a dash trim removal tool under the bezel and pry upward, releasing a retainer clip. Move the tool forward to release all the clips. Set trim bezel aside.

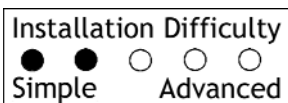

STEP 2. Next, remove the vent panel located to the right of radio and climate control module. **(Photo #1).** Insert the removal tool behind the top of the vent assembly and pry outward, releasing a clip. Continue downward until all clips are released. Pull the vent slightly out of the dash cavity and disconnect the wiring to the switch on the back of the vent. Remove the vent completely and set aside.

STEP 3. Place the Legend against the right side of the vent cavity. **(Photo #2).** Slide the Legend into the dash until it is out from the dash pad approximately 1/8". Using the Legend as a guide, mark the location of two (2) screw holes. Set Legend aside. Drill two (2) pilot holes at the marked location using a 5/64" drill bit and drill. Align the Legend over the pilot holes, insert two (2) #8 x 1/2" screws and tighten.

STEP 4. Re-assemble the dash in reverse order. This completes the installation of your Legend.
