

# Chevrolet Equinox 2010 - 2017

## PART NUMBER: TY-71-00-G3

**\*PLEASE READ COMPLETE INSTRUCTIONS BEFORE INSTALLING THIS VSM G3\***

All instructions assume a driver's seat vantage point. Caution is advised when removing and reassembling wood or plastic parts of a dash. Applying unnecessary force or pressure may cause a piece to crack or break.

When properly installed, the metal between the ball and the small hole is all that is exposed. (Some exceptions apply).

**TOOLS REQUIRED:** Dash Trim Removal Tool (DTRT), Socket Wrench, 7mm Socket

**PARTS INCLUDED:** VSM G3, J-Stem, Lock Plate

**LOCATION:** Right of Vent

**Step 1:** Using the DTRT, remove the storage cubby or panel above the radio. To remove storage cubby: open cubby, remove non-slip rubber pad, remove the 2-7mm bolts, then just lift out of place and set aside. If you have the panel, use a DTRT to lift up and pop the retainer clips holding down the panel. The panel will be tethered with plastic strings. No need to remove it fully. (Photo #1)

**Step 2:** Remove the radio and climate controls (held by retainer clips). On top right and left, behind silver trim, pull to pop top clips. Then, pull from bottom of the silver trim in the center to pop remainder clips. Unplug wire harness from the back and set aside.

**Step 3:** Remove 2-7mm bolts on the right holding the vent. Then remove the vent. Remove 1 trim bolt.

**Step 4:** Using the DTRT, pull the thin trim piece aside between the vent and the airbag to place G3 mount in-between. Align screw hole of G3 mount (hole closer to G3 ball) with trim hole. Place bolt back in place and tighten.

**Step 5:** Reverse steps 3 to 1.
