

THE SECRET

what to expect

PHASE 1 / REMOVE *weeks 1-6*

Clinical Action

Penetration below the surface of the skin to correct signs of aging and acne flares. The top layer of the skin is exfoliated, removing dull, old skin cells to help promote new skin cells.

Skin Results

Your skin will begin to adapt. Expect to experience itching, dryness, and redness that should subside by the end of phase 2. You will begin to notice a more even toned appearance of your skin.

PHASE 2 / RESTART *weeks 7-12*

Clinical Action

Skin produces normal, healthy cells. Pigment cells are distributing melanin more evenly.

Skin Results

Your skin is now adjusting to the system and you will notice smoother, softer and clearer skin. Skin is becoming more even toned.

PHASE 3 / REFRESH *weeks 13-18*

Clinical Action

Skin cells are in the process of transformation.

Skin Results

Your skin is becoming clearer, firmer looking, naturally hydrated, more even toned.

PHASE 4 / RESTORE *continued results*

Clinical Action

Your skin looks restored. Healthy skin needs to be maintained.

Skin Results

More radiant, even toned and resilient-looking skin.
