Artificial Turf Adhesives

Our selection of artificial turf adhesives have been expertly crafted to provide the very best in quality, performance, and reliability.

Turftak1 One-Component Adhesive

Turftak1 is a solvent-free, one-part polyurethane artificial turf adhesive. It comes in a portable and resealable 1 gallon bag with an easy fit handle. The adhesive's nature helps to gap fill slight voids between substrates, while remaining easy to apply with a trowel or a glue box.

After curing, Turftak1 adhesive produces negligible foaming, with a strong yet flexible bond that is guaranteed to outlive your turf. Indoor turf applications are also never compromised due to its solvent-free formulation.

Turftak1 LV One-Component Low Viscosity Adhesive

Turftak1 LV is a solvent-free, one-part polyurethane artificial turf adhesive. This moisture cure product is an ideal choice for application in high temperature and humid climates.

Turftak1 LV easily pours from pails, jugs and convenient squeeze bottles. It effortlessly bonds with seam tape, concrete, wood, asphalt and other common substrates, and can be easily applied using a notched trowel or glue box, or simply spread directly onto surfaces.

Turftak1 HV One-Component High Viscosity Adhesive

Turftak1 HV is a one-part polyurethane adhesive formulated for artificial turf. Its high viscosity creates a strong, instant tack bond, whilst retaining flexibility.

The solvent-free adhesive comes in 20oz sausages that can be neatly and easily dispensed straight out or through a 4" rake head spreader nozzles with a manual or battery powered sausage gun.
