Mr. Linc says, "Our best corrosion fighter!"

Glenn Danny

**Glenn Spungen, President**

*"Smart companies recognize the harmony between the employee and the customer. When you take care of one, you take care of the other. At Peer we take care of both with equal measure — because this is how lasting relationships work. And relationships are our passion."*

Glenn describes himself as an average guy with no unique talents. Kind of funny coming from someone who spent 27 years in sales and operations for a well-recognized global company. Since 2012, Glenn has been President of Peer Chain. He is a graduate of the Kelley School of Business at the University of Indiana. Glenn believes in transparent leadership and treating others — employees and customers alike — the way he would like to be treated. He also believes in making Peer the definitive chain solution for the customer — both in terms of product availability and customer support. Happily married since 1991, Glenn and his wife have three wonderful children, and in his spare time he enjoys Chicago Blackhawks hockey, travel, cycling, golf, and gardening.

**Danny Spungen, Vice President Strategic Marketing**

*"Creativity in business is a game changer and a differentiator, whether you're selling cars, cheese, or chain!"*

Danny Spungen is power transmission! It's in his DNA. Also in his DNA is a passion for teamwork and developing innovative and creative ways to go to market, as well as building mutually beneficial lasting relationships. Danny has been part of the Peer Chain family since working summers during college. He's been fulltime since 1983. Danny is also passionate about philanthropy, World War II history, and an array of collectibles, including sports cards, stamps, Hot Wheels, and coins. When you visit Peer, don't be surprised if you are greeted by one of Danny's dogs or meet one of the 11 Rotary Club foreign exchange students his family has hosted over the years. Danny has a very big vision of "family".

**Chuck Briere, National Sales Manager**

*"Family, family, family. What else is there to say?"*

What do you say about a guy who has been in the bearing and power transmission business for over 40 years? Yes, besides being a little crazy! But here's the thing. Chuck loves selling chain, and he loves working at Peer. Why? Because chain is a technical product, and he enjoys the science of it. And Peer is like a family — a family with principals, who have principles, personality, and character. Moreover, Peer is dedicated to seeing its customers succeed as well as its industry grow. When Chuck isn't moving chain, he's attending his grandsons' baseball, soccer and hockey games, reading, taking walks with his wife, Linda, who he has been with just as long as he's been in this business. Oh, and here's something else pretty cool about Chuck. Now a retired Colonel, Chuck served his country for 35 years in the Army Reserve, where he learned that people are and always will be our greatest asset.

**Jeremy Fogo, Product Manager**

*"Treat others with kindness and respect, the rest will take care of itself."*

A consummate people person, Jeremy finds the work he does with his Peer customers incredibly rewarding. Being able to solve challenges for the Peer customer is something that gets Jeremy out of bed each morning, and he loves the culture and network of talented individuals with whom he works. Jeremy joined Peer Chain in 1997 as a Regional Sales Manager. He was then VP of Sales before assuming his current role of Product Manager. When he isn't solving power transmission conundrums, Jeremy is all about his family. He and his wife have two teenagers who together love to travel, especially to Disney World. He also enjoys classic muscle cars and the great outdoors.

**Eric Ma, Manager of Engineering & Quality**

*"Delivering nothing less than precision to the Peer customer is off the table."*

A more befitting title could not be given to Eric, unless it was to also include something about his strength of character. Engineering and quality is what Eric lives, breathes, and embodies day in and day out. Since coming to Peer in 2010, he has thrived in his role because of his intellect, dedication, and motivation. Eric loves the family-owned business environment and leadership at Peer, and finds it to be the perfect platform for exercising his knowledge and experience of the power transmission industry. Eric holds a B.S. in Material Science, an M.S. in Chemical Engineering, and another M.S. in Computer Science. And if that weren't enough, he also is a Certified Professional for Supply Management (CPSM). When he isn't developing precision chain solutions for our customers, Eric enjoys time with his wife and teenage son, as well as music and sports.

**PEER ProCoat®**  
 Corrosion-Resistant Chain

**TOUGH conditions  
 need TOUGH chain!**

## In the Fight Against Corrosion, You Can Depend on ProCoat®!

Peer ProCoat® corrosion-resistant roller chain fights corrosion when exposed to some of the harshest outdoor environments, even seawater. With ProCoat, you get the durability and load-bearing features of carbon steel, but with corrosion protection that is superior to other moisture-proof chains, including nickel-plated chain. And ProCoat corrosion-resistant chain offers the same high maximum working load as our standard carbon steel roller chain.

## 500 Hours and Still Running – That’s a Fact!

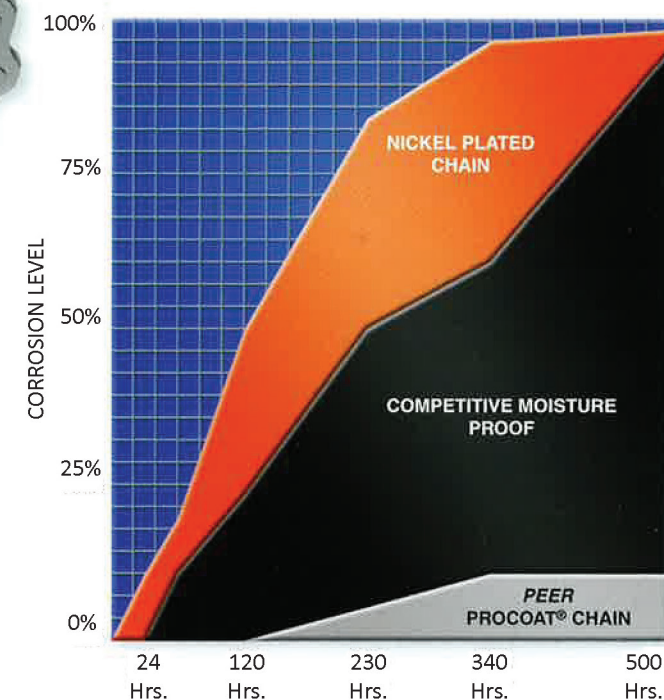

Laboratory tests confirm — ProCoat beats nickel-plated roller chain and competitive moisture-proof chain in 500 hours of testing under saltwater spray. Only ProCoat showed no evidence of mechanical binding due to links becoming frozen or bonded from corrosion in the chain joints. So, if you’re looking for a chain that won’t chip, flake, peel or rust in some of the toughest conditions, don’t settle for anything less than ProCoat corrosion-resistant chain.

*For specific test parameters and results, please send us your request in writing.*

### Comparison Test

*500 hours of testing under saltwater spray prove that Peer ProCoat® Chain has outstanding anti-rust, anti-corrosion properties.*

## Quest® Upgrade — Extended Wear at a Price that Boosts Your Bottom Line

Peer’s innovative Quest solid bushing chain provides 30% more wear than conventional roller chain, regardless of the length of chain. And now, Quest is available with our exclusive ProCoat process, providing longer lasting, rust-resistant roller chain.

## What Makes ProCoat® Better?

ProCoat combines advanced materials technology with the leading-edge processing for our toughest corrosion-resistant chain — standing up to some of the most demanding environmental challenges. Applied to each part of the chain before and after assembly, the ProCoat protection process delivers a thorough coating that prevents premature breakdown not only to the flat surfaces of the chain, but also to the joints. The result is a chain that delivers the tensile strength and working loads of carbon steel. And our exclusive lubrication process provides further protection making ProCoat the easy choice.

## ProCoat Corrosion Resistant Chain

- Stronger, more impact-resistant than stainless steel.
- Provides protection against a wide variety of corrosive elements.

## Sizes and Varieties

- 35 chain and larger: single or multiple strands
- Single strand and extended pitch attachments
- Agricultural chain: with or without attachments
- Extended pitch chain
- Leaf chain
- Quest solid bushing chain

*Note: ProCoat corrosion-resistant chain is not intended in environments where chain comes in contact with food.*
