

### MK700 Instructions

1. Please open the Forza motor by pushing the dark red button located on the motor.
2. Inside the motor, you will see a receiver board, locate the SW1 button and press this once.
3. Next press one of buttons on the new remote (any button) twice.
4. Please wait a few seconds and test the new remote. Then put the cover back.

For Gates/Main Doors of unit complexes, the S1 (program) button is usually located in the stand alone receiver ( it can be found near the motor), as the picture shown below:

As the arrow pointing, the SW1 (Learn\_1) button is inside the receiver, then you can follow the same instructions above.
