Micro: Select Tracfones, Speakers, Cameras, Power Banks, & More

Lightning: Compatible with iPhones, AirPods, & Most Apple Devices

Type-C: Compatible with newer devices by Samsung, Microsoft, LG, Google, Huawei, select Apple iPads (2018 and newer), select Tracfones, and More.

GETTING STARTED

The Tassel Keychain Power Bank will arrive with a partial charge. It is recommended to charge the battery to 100% upon arrival and after each use. The included Charging Cable is reversible and can recharge the power bank or another USB-chargeable device.

Carabiner Ring
The Carabiner Ring will come attached to the Tassel Keychain Power Bank. Push the lever to attach it to a purse or keychain.

CHARGING THE POWER BANK

Plug the Type-C Connector into the Type-C Input and a USB charger (not included). The Power Indicator Light will blink while charging and will go solid once fully charged.

The Power Indicator Light will blink once the battery level reaches 5% to indicate it is time to recharge.

RECHARGING A DEVICE

Plug a USB charging cable into the USB Output then into a USB chargeable device. The device will begin to charge.

How to Use the 36in Charging Cable *(See Figure A)*
*The Type-C Connector is the power source. The Lightning and Micro adapters will **NOT** charge anything without being connected to the Type-C Connector.

1. Choose the charging adapter that is compatible with the device.
2. If the device uses the Type-C Connector, plug it directly into the device.
3. If the device uses the Lightning or Micro adapters:
   A. Insert the Type-C Connector into the bottom of the adapter.
   B. Once the Type-C is connected to the compatible adapter, plug the adapter into the device.
4. Connect the USB Plug on the Charging Cable to the USB Output. The device will begin to charge.

Figure A

To use the Lightning or Micro Adapter, connect it to the Type-C Connector.
