BRITE U

A clear head makes for perfect results. Light flows down onto your workplace from a discreetly designed light fitting, creating scope for creativity and precision. Every day.

Imagine looking forward to going to work every day. Being able to work in the best possible conditions every day. Being the best you can be. And when the working day is done you still feel good and full of energy because your brain hasn't had to waste energy on focusing your eyes. This is a light that focuses on the quality of the light that it provides. Brite U brightens up your working day.

For workplaces with high standards

Brite U is developed for those who work in clinical environments.

The patient gets a more comfortable experience when the light is not directed straight down.

Control everything with just a few buttons

IR-remote control for dimming effects, but also has two programmed presets for working in different modes, such as viewing X-rays and working with composite materials.

Light quality is key!
