Greek Alphabet Code Cracker Cypher Wheel

- 1. Cut out the two pieces (this page and page 79) along the dotted lines.
- 2. (Optional) Glue the two pieces to cardboard circles cut to match.
- 3. Carefully cut out the small window in the cypher wheel top, indicated by the red X.
- 4. Using a brad, punch a small hole in the centers of both pieces (marked by the white crosshairs) and join the pieces, careful to keep the centers aligned (see Figure 1).
- 5. Spin the wheel on the axis created by the brad. When you point the arrow to a Greek letter, the matching English letter will be visible in the window.
