# Stylus Attachment Instructions

1. Using the barrel key provided, unlock the head enclosure and remove the faceplate.
2. **Important**: Remove your tablet before attaching the stylus holder.
3. Position the stylus holder where you want to attach it on the face of the head enclosure.
4. Insert the 6-20 screws provided into the holes in the stylus holder.
5. Using a drill, tighten the screws into the enclosure.

If you need to remove the stylus holder, unscrew the screws slowly and carefully to ensure the threads aren't stripped and that you can use the same holes when re-attaching.
