

# MTNTK PERFORMANCE

The RZR 900 TRAIL | S | XC | 1000s  
CLEAN AIR PRE-FILTER KIT INSTRUCTIONS

1. Remove access panel from RZR and remove the center console as shown. This requires the removal of the eight torx head screws on the front and back of the cover.

2. Remove the stock air intake plenum and rubber cap from air box as shown. Place a towel or rag inside the air box to keep debris from entering the engine.

3. Place a tape measure on the top of the plastic console. Measure and mark 3" with a white pen or marker as shown.

4. Turn tape measure around and measure the width of the plastic console as shown. Measure 3" with a white pen or marker. Use a center punch to mark junction between the two lines.

## MTNTKperformance.com

5. Using a 3 1/2" Hole Saw, cut the access hole as shown through the plastic console. Deburr the edges and clean all plastic shavings from inside console. Install plastic console back in place.

6. Place the aluminum tube inside one of the 90° silicone. Install on air box with aluminum tube showing outside of the hole. Place remaining silicone on aluminum tube as shown.

7. Tighten stock clamp on air box and silicone. Make sure everything fits. This may require turning and adjusting the silicone to fit, depending on accessories.

8. Install Pre-Filter as shown with MTNTK Logo facing out. Center the housing between cage tabs above the Pre-Filter. Secure all screws and clamps. Be sure you have removed rag from air box. Reinstall bed access panel.

***Disclaimer:** All MTNTK Performance Products are designed to offer unmatched reliability and dependability while adding horsepower and performance. They do not however offer any sort of gains from engines or machines that have preexisting problems or conditions. MTNTK Performance is not liable for any malfunctions, mishaps, engine problems, or any other unforeseen problems that may occur after purchasing this or any other MTNTK Performance Product.*
