Material Steel, Thermoplastic rubber.

2.05 kg

INSTRUCTIONS

No tools required.

1. To prepare for use, loosen base knob and raise holder arm. Retighten knob.
2. On non-chain side of bike, carefully insert wheel axle (the narrow space between chainstay and wheel hub) into wheel axle rest.
3. With wheel sitting firmly in wheel rest, adjust holder arm height to fit your bike snugly. Tighten knob securely.
4. To store stand, or to carry, fold stand by dropping holder arm. To fully fold, it might be necessary also to adjust arm height.

WARNINGS

For rear wheel use only.

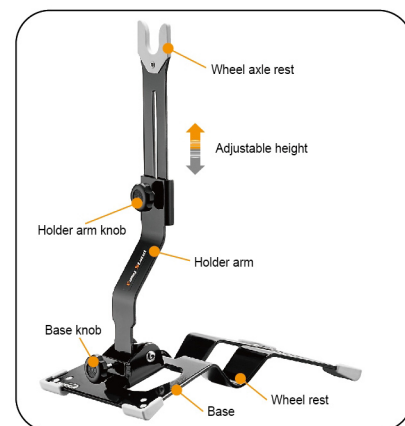

Only use stand on a flat, stable surface. Max. Load 15 kg.

Stand is designed to support a bicycle only—do not sit on bicycle while it is in the stand.

The stand can be used for basic bike maintenance but do not lift the rear wheel off the wheel rest or the bike will be unstable.

The Allen bolt attaching the base and the holder arm is not for adjustment—do not loosen.

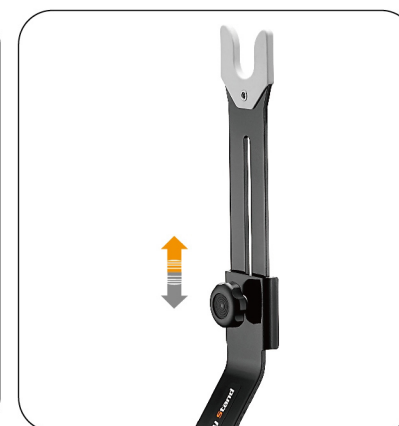

To prevent rust, avoid using in wet environments. Store in a dry place.
