

Rear view

Use on left side of bicycle.

Compatible with most frame-mounted touring carriers with a rail diameter of 9 – 12 mm.

Bag Use Note: Illustrations show rear view of bag.

1

Unzip hook cover. Expose hanging hooks by folding cover (including carry strap) into itself.

2

Mount bag on left side of bike by seating hooks securely on carrier rail. Note: Bag is meant to have an angled position.

3

Undo Velcro strap behind carrier rail. Pull it up and over carrier rail, and fasten again tightly.

4

Undo buckle strap, and wrap around lower section of carrier legs. For best results, wrap around three legs (see A). If this is not possible, wrap around one or two legs (see B).

Carriers shown are for illustration only, and may not look the same as your carrier.

Warning

1. Not compatible with seatpost-mounted carriers and some types of city bike carriers.

2. If your heel brushes bag when pedaling, slide it slightly towards rear of carrier.

3. Always ensure bag is secure on carrier before using.

4. Ensure there are no straps or other items protruding from bag.

5. DANGER—bag should NOT make contact with rear wheel. To check this, attach bag, and shake bike vigorously. Repeat this with bag fully packed. If any part of bag touches wheel, you may need to reconsider your carrier setup. Consult a bicycle shop for advice.

6. Do not use for off-road riding.

7. For better stability, pack heaviest items in bottom of bag.
