

Compatible with most frame-mounted touring carriers with a rail diameter of 9 – 12 mm.

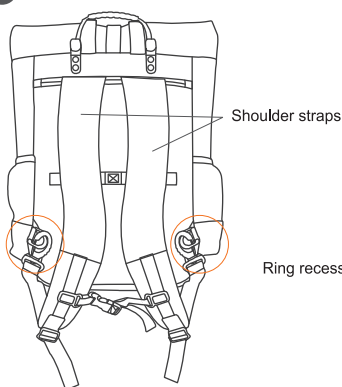

**Pannier**  
Pannier can be used on either right or left side of bicycle carrier (rack).

**Backpack**

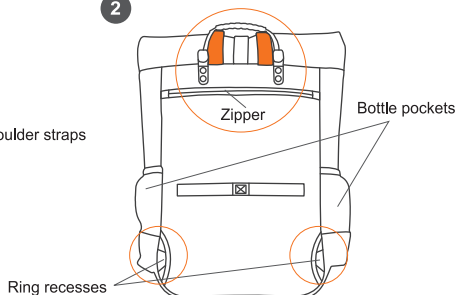

## Pannier Use

1

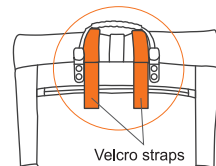

Before converting backpack to pannier, pack away shoulder straps. Unclip straps, and fold neatly into zippered sleeve on rear of backpack.

2

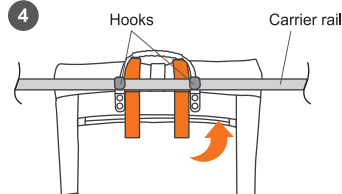

Push shoulder strap rings into recesses.

3

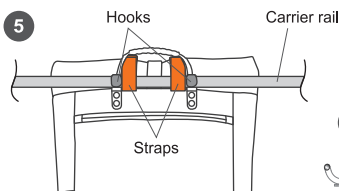

Unfasten Velcro straps on top of bag.

4

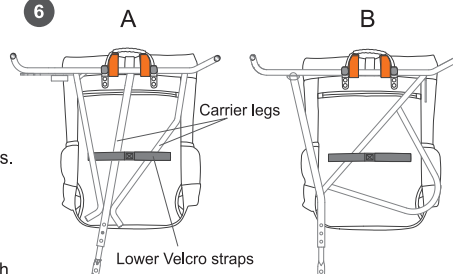

Fit pannier hooks over carrier rail.

5

Wrap Velcro straps around carrier rail and refasten.

6

Wrap lower Velcro straps around lower section of carrier legs. For best results, wrap around two legs (see fig. 6A). If this is not possible, wrap around one leg (see fig. 6B).

### Warning

1. Not compatible with seatpost-mounted carriers and some types of city bike carriers.

2. DANGER—pannier should NOT make contact with rear wheel. To check this, attach panniers, and shake bike vigorously. Repeat this with pannier fully packed. If any part of pannier touches wheel, you may need to reconsider your carrier setup. Consult a bicycle shop for advice.

3. For proper heel clearance, remove items from pannier side pocket that faces front of bike. If your heel still brushes pannier when pedaling, loosen pannier and slide it slightly towards rear of carrier. Retighten.

4. Always ensure pannier is secure on carrier before using.

5. Ensure there are no straps or other items protruding from pannier.

6. Do not use for off-road riding.

7. For better stability, pack heaviest items in bottom of pannier.
