

## Southern Yellow-billed Hornbill

The southern yellow-billed hornbill is a medium sized bird found in all areas of Southern Africa, it likes to live in scrub and acacia woodlands. You will notice its very large, downwardly curved yellow beak first, then the pink skin around its eyes. It has white feathers on the belly and grey feathers on the neck with the back and wing feathers being speckled with black and white. The yellow-billed hornbill is an omnivorous bird, meaning it will eat all sorts of things from spiders and lizards to fruits and nuts. It likes to find its food on the floor and likes to live in groups with other hornbills.
