1. CHARGING INSTRUCTION

Please fully charge the case and ear buds before first time use. The different numbers of LEDs on the bottom of the charging case flashing will show the different charge level of the case; see the chart below for details. When the charging case is fully charged, all four lights turn on.
Power	LED light
<25%	The first light is flashing
25-50%	The first light is on, and the second light is blinking
50-75%	The first two light is on, and the third light is blinking
75-99%	The first three lights are on, the 4th light is blinking
100%	All four lights are on

2. POWER ON/PAIRING MODE

Open the charging case while the earbuds are still in the case to initiate pairing mode. Enter Bluetooth settings on your device and select *Argon Audio IE20* to start pairing. If the pairing was successful; you will hear the "connected" voice prompt in the ear buds.
To enter pairing mode manually, place both left and right earbuds into the charging case, keeping the case cover open. Press and hold the charging case button for 5 seconds. The four LEDs will flash alternately in pairs before emitting constant light for 3 seconds. This indicates that the earphones have entered Bluetooth searching and pairing mode. If there is no connection in pairing mode for 5 minutes, the earbuds will automatically power off.
