

# FORTE A55 IS ARGON AUDIO'S FIRST FLOOR STANDING ACTIVE STEREO SPEAKERS

– DELIVERING VALUE FOR MONEY IN A NEW CATEGORY

Today Argon Audio launched their most ambitious speakers to date, the active FORTE A55. Based upon the popular design of its smaller siblings, the compact FORTE A4 and A5, this new speaker is Argon Audio's first floor standing active speaker design. Thanks to advanced technology and new custom designs, the speaker maintains a small form factor, while delivering room filling sound with impressive bass extension.

## DESIGNED IN DENMARK

Just like everything Argon Audio makes, the FORTE A55 is designed and engineered in Denmark with careful attention to detail. The front fabric is magnetically attached, giving it a beautiful look when the grilles are removed. Stylish silver or copper rings around the drivers adds the finishing touch.

## VERSATILE CONNECTIVITY WITH A RETRO TOUCH

Listening to your favorite music is made easy thanks to built in Bluetooth supporting aptX and AAC for high quality wireless streaming. Two optical inputs for TV's and streamers supporting high-res audio up to 24-bit/96kHz can be found on the back alongside an analogue line input and a high quality phono input for easy connection to any turntable. There's also a subwoofer output if even more bass is desired.

## ADVANCED TECHNOLOGY

Utilizing an advanced digital sound processing (DSP) with active crossover, the mid/bass woofers and tweeters have their own dedicated amplifiers. A new custom engineered bass driver with a 2-layer cone delivers price class leading performance with ultra low distortion in the critical midrange. All of this is housed in a stylish cabinet that has been designed using advanced computer models featuring an acoustic flow resistor between the two woofers that

eliminates standing wave resonances. Combined with careful tuning and consideration the result is an open and crisp soundstage with well defined bass that delivers punch no matter the volume.

### **PRICING AND AVAILABILITY**

Argon Audio FORTE A55 is available from November 22 at [argonaudio.com](http://argonaudio.com) and HiFi Klubben at **8498 NOK** for a pair. First orders will be shipped on November 22.

A 5 meter cable for use between the speakers is included while longer versions are sold separately.

### **ABOUT ARGON AUDIO**

Argon Audio is a Danish audio company founded 20 years ago with a clear goal, to deliver high quality products at value-for-money prices. Everything is designed and engineered in Denmark and carefully tuned to deliver a level of performance that punches above their respective price classes. Today, Argon Audio makes products in a variety of categories, from speakers, amplifiers, turntables, headphones, radios and streamers. All products come with 3 years of warranty.

In April of 2019, Argon Audio launched their web shop, offering free delivery to all countries within the EU (and Norway). Today the products are available in 28 countries via our web shop and local retailers, with more to come.
