## 2 Overview

Before connecting the LCD screen, please confirm that all accessories are in accordance with the accessories. Please pay special attention to the LVDS line specification.

This driver board is mainly used to support TFT LCD screen. The driver board has 1 channel VGA, 1 channel DVI and 1 channel HDMI interface, and supports LVDS output interface and eDP output interface. The motherboard adopts MTK signal processing chip, which has powerful processing function and can support various standard and non-standard signals. The use of high specifications of the device, with good working performance.

- \* **Operating temperature range : -20 ~ 65°C。**
- \* **Optional addition of automatic light sensitive control**
- \* **Maximum resolution :1920x1200。**
- \* **receive remote control function**
- \* **Basic resolution up to 85Hz (if the LCD screen works at 85Hz)**
- \* **Supports LVDS output and eDP output**
- \* **Maximum amplifier support : 2X10W**
- \* **Supports serial protocol control**

### 3 Feature

|           |                                |   |       |              |            |                |
|-----------|--------------------------------|---|-------|--------------|------------|----------------|
| OUTPUT    | Maximum Resolution             | Max: 1920x1200                                    |       |              |            |                |

Note1: Please test the maximum power consumption according to the actual use

### 4 Parameter

| Item | Description                              | Min | Typ   | Max | Unit  | Note                   |
|------|--|-----|-------|-----|-------|------------------------|
| Vin  | Input voltage                            | 10  | 12    | 16  | V(dc) | Note1)                 |
| Iin  | Input current                            |     | 0.089 |     | A     | 12V input (Board only) |
| Ir   | Impulse current                          |     |       | 1.5 | A     |                        |
| Vadj | The back light plate adjusts the voltage | 0   | T     | 5V  | V(dc) |                        |
| Hst  | Humidity of storage                      | 10  |       | 90  | %RH   |                        |
| Hop  | Operating humidity                       | 10  |       | 90  | %RH   |                        |
| Tst  | Storage temperature                      | -20 |       | 65  | °C    |                        |
| Top  | Temperature of operation                 | -20 |       | 65  | °C    |                        |

Note1) : Because the voltage of the backlight board is taken from the motherboard, please pay attention to the input voltage of the backlight board.

Note2) : The input current test does not include A power amplifier, the input current is 0.045A without signal, and the input current is 0.066A when the VGA signal is connected, and the DVI is connected, Or HDMI signal when the input current is 0.077A, three signals at the same time access to the input current is 0.089A.

## 6 Connector

### 6.1 Power Input (CN100)

| Pin No. | Function | Pin No. | Function |
|---------|----------|---------|----------|
| 1       | GND      | 2       | 12V      |

### 6.2 Power Input (J100)

| Pin No. | Function | Pin No. | Function |
|---------|----------|---------|----------|
| 1       | GND      | 3       | 12V      |
| 2       | GND      | 4       | 12V      |

### 6.3 LVDS/eDP Output (J300)

| Pin No. | Function      | Pin No. | Function |
|---------|---------------|---------|----------|
| 1       | VCC           | 16      | RXOC+    |
| 2       | VCC           | 17      | RXO3-    |
| 3       | VCC           | 18      | RXO3+    |
| 4       | AUX_CH_P      | 19      | RXE0-    |
| 5       | AUX_CH_N      | 20      | RXE0+    |
| 6       | GND           | 21      | RXE1-    |
| 7       | RXO0-         | 22      | RXE1+    |
| 8       | RXO0+/eDP_HPD | 23      | RXE2-    |
| 9       | RXO1-/LANE0_N | 24      | RXE2+    |
| 10      | RXO1+/LANE0_P | 25      | GND      |
| 11      | RXO2-/LANE1_N | 26      | GND      |
| 12      | RXO2+/LANE1_P | 27      | RXEC-    |
| 13      | GND           | 28      | RXEC+    |
| 14      | GND           | 29      | RXE3-    |
| 15      | RXOC-         | 30      | RXE3+    |

Note: 1. When connecting to a single LVDS screen, please connect to the one near the power pin.

2. Marked in red is the point eDP panel card end definition, not our standard eDP dupont seat definition.

---

## 6.4 eDP FPC Output (CN300)

| Pin No. | Function | Pin No. | Function |
|---------|----------|---------|----------|
| 1       | NC       | 16      | GND      |
| 2       | GND      | 17      | eDP_HPD  |
| 3       | LANE1_N  | 18      | GND      |
| 4       | LANE1_P  | 19      | GND      |
| 5       | GND      | 20      | GND      |
| 6       | LANE0_N  | 21      | GND      |
| 7       | LANE0_P  | 22      | EN       |
| 8       | GND      | 23      | ADJ      |
| 9       | AUX_CH_P | 24      | NC       |
| 10      | AUX_CH_N | 25      | NC       |
| 11      | GND      | 26      | +12V     |
| 12      | VLCD     | 27      | +12V     |
| 13      | VLCD     | 28      | +12V     |
| 14      | NC       | 29      | +12V     |
| 15      | GND      | 30      | NC       |

## 6.5 OSD Interface (J202)

| Pin No. | Function | Pin No. | Function |
|---------|----------|---------|----------|
| 1       | POWER    | 6       | DOWN     |
| 2       | LED_R    | 7       | AUTO     |
| 3       | LED_G    | 8       | MENU     |
| 4       | GND      | 9       | E/S      |
| 5       | UP       | 10      | KEY1     |

## 6.6 Backlight Interface (J301)

| Pin No. | Function | Pin No. | Function |
|---------|----------|---------|----------|
| 1       | 12V      | 4       | ADJ      |
| 2       | 12V      | 5       | GND      |
| 3       | EN       | 6       | GND      |

**Note:** ADJ supports both voltage and PWM to adjust brightness. When connected to a screen with a built-in backlight board constant current source, please connect this pin to the 'PWM' of the LCD screen, and then choose our program with PWM logo

---

## 6.7 Analog RGB Interface (J400)

| Pin No. | Function | Pin No. | Function |
|---------|----------|---------|----------|
| 1       | GND      | 7       | G        |
