## 1 Revision History

| Date       | Changes       |
|------------|---------------|
| 2022-08-05 | First release |

## 2 Main Features

| Item              | Specification      | Unit  |
|-------------------|--------------------|-------|
| Diagonal Size     | 1.39               | inch  |
| Display Mode      | AMOLED             | -     |
| Piexl size        | 0.078*0.078        | mm    |
| Resolution        | 454 x 454          | pixel |
| Controller IC     | ICNA3310           |       |
| Touch IC          | ZTW523             |       |
| LCD Interface     | MIPI-1 lane        | -     |
| Touch Interface   | I2C                |       |
| Viewing Direction | ALL                |       |
| Active Area       | 35.41 x 35.41      | mm    |
| Panel Dimension   | 40.3 x 41.8 x 2.45 | mm    |
| Weight            | TBD                | g     |

### 3 Pin Description

| Pin No. | Symbol                | Function Description                    |
|---------|-----------------------|---|
| 1       | VCI_EN                | VCI Power enable control pin            |
| 2       | VPP(NC)               | OTP Power Supply                        |
| 3       | TP_SDA                | Touch panel I2C data                    |
| 4       | TP_SCL                | Touch panel I2C clock                   |
| 5       | TP_SWDIO<br>(NC)      | --                                      |
| 6       | TPRST                 | AMOLED positive power supply            |
| 7       | TPINT                 | Driver analog power supply              |
| 8       | TP_VCC(3.0V)          | Touch panel power supply                |
| 9       | GND                   | Ground                                  |
| 10      | LCD_RST               | LED reset                               |
| 11      | LCD_TE                | Tearing effect signal                   |
| 12      | GND                   | Ground                                  |
| 13      | ALS_SDA               | ALS Serial Data Transport Interface     |
| 14      | ALS_SCL               | ALS Serial clock signal interface       |
| 15      | ALS_INT               | ALS interrupt output                    |
| 16      | ALS_VCC               | ALS Power supply voltage                |
| 17      | GND                   | Ground                                  |
| 18      | GND                   | Ground                                  |
| 19      | LCDID0                | IDCheck                                 |
| 20      | LCD_VDDIO(T<br>P-1V8) | Powersupply1.8V                         |
| 21      | LCD_VDDIO(T<br>P-1V8) | Powersupply1.8V                         |
| 22      | GND                   | Ground                                  |
| 23      | MIPI_CLK_P            | MIPI clock lane positive end input pin  |
| 24      | MIPI_CLK_N            | MIPI clock lane negative end output pin |
| 25      | GND                   | Ground                                  |
| 26      | MIPI_D0_P             | MIPI data0+                             |
| 27      | MIPI_D0_N             | MIPI data0-                             |
| 28      | GND                   | Ground                                  |
| 29      | NC                    | -                                       |
| 30      | NC                    | -                                       |
| 31      | VPH_PWR               | Vbat, Power IC VIN                      |
| 32      | GND                   | Ground                                  |
| 33      | GND                   | Ground                                  |
| 34      | VPH_PWR               | Vbat, Power IC VIN                      |
| 35      | VPH_PWR               | Vbat, Power IC VIN                      |
| 36      | GND                   | Ground                                  |

## 5 Optics & Electrical Characteristics

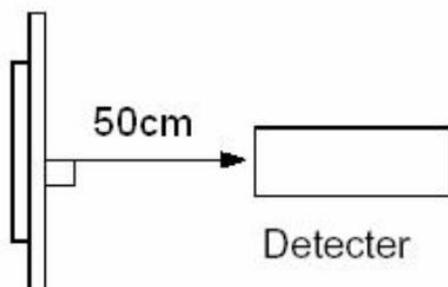

### 5.1 Optical Characteristics

| Item                 | Symbol     | Min            | Typ            | Max            | Unit              | Remark              |
|----------------------|------------|----------------|----------------|----------------|-------------------|---------------------|
| View Angles TOP      | ⊕ U        | 80             | 85             | -              | °                 | CR >= 200<br>Note 3 |

| Crosstalk            | ΔCT        | -              | -              | 1.1            | hrs               | Note 7              |

#### Note1: Luminance measurement

The test condition is measured on the surface of AMOLED module at 25°C.

- Measurement equipment CS2000 or similar equipment(Field of view:1deg,Distance:50cm)•  
Measuring surroundings:Dark room.
- Measuring temperature:Ta=25°C.
- Adjust operating voltage to get optimum contrast at the center of the display.

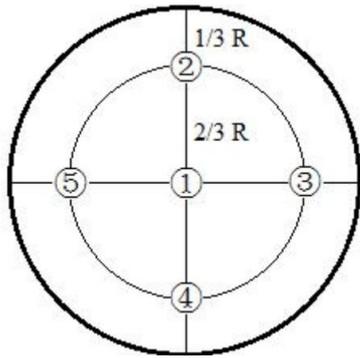

#### Note2: Uniformity

The luminance uniformity is calculated by using following formula:

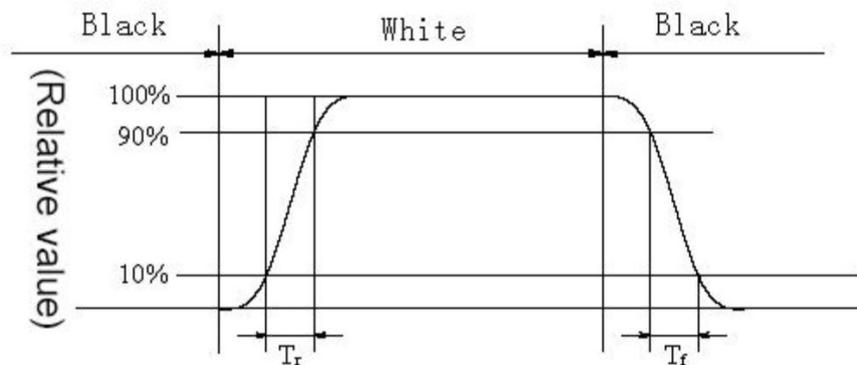

$$\Delta B_p = B_p(\text{Min.}) / B_p(\text{Max.}) \times 100(\%)$$

$B_p(\text{Max.})$  = Maximum brightness in 5 measured spots

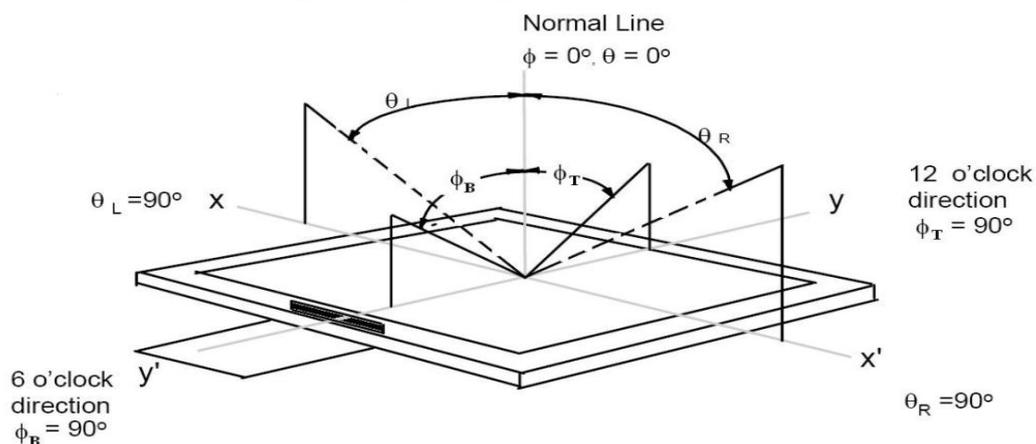

$B_p(\text{Min.})$  = Minimum brightness in 5 measured spots.

**Note 5: Definition of Response time.**

The output signals of photo detector are measured when the input signals are changed from “black” to “white” (Voltage falling time) and from “white” to “black” (Voltage rising time), respectively. The response time is defined as the time interval between the 10% and 90% of amplitudes. Refer to figure as below.

**Note 3: The definition of Viewing Angle**

Refer to the graph below marked by  $\theta$  and  $\Phi$

**Note 4: The definition of Contrast Ratio:**

$$\text{Contrast Ratio (CR)} = \frac{\text{Luminance When AMOLED is at "White" state}}{\text{Luminance When AMOLED is at "Black" state}}$$

**Note 6: Gamma curve**

The whole curve's tolerance must control within +/-0.3, test the gray scale below:

8, 16, 25, 33, 41, 49, 58, 66, 74, 82, 90, 99, 107, 115, 123, 132, 140, 148, 156, 165, 173, 181, 189, 197, 206, 214, 222, 230, 239, 255

**Note 7: Crosstalk**

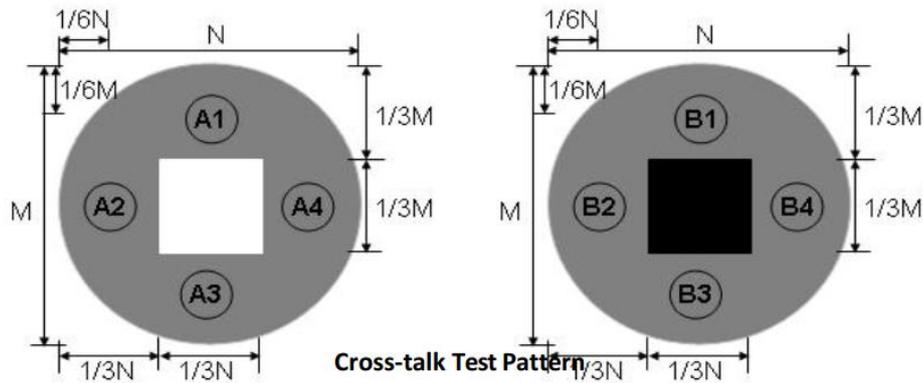

There should be no visible cross-talk in normal direction of the display when the two "Cross-talk Test Patterns" below are loaded.

$\Delta Bp$  (Max.) = Maximum value in  $\Delta Bp1 \sim \Delta Bp4$ .

$\Delta Bp$  (Min.) = Minimum value in  $\Delta Bp1 \sim \Delta Bp4$ .

$\Delta CT = \Delta Bp$  (Max.) /  $\Delta Bp$  (Min.).

$\Delta CT$  must be less than 1.10

## 5.2 Absolute Maximum Ratings

| Parameter             | Symbol          | Min  | Max | Unit |
|-----------------------|-----------------|------|-----|------|
| Analog Supply Voltage | V <sub>CI</sub> | -0.3 | 3.6 | V    |
| Operating temperature | T <sub>op</sub> | -20  | 60  | °C   |
| Storage temperature   | T <sub>st</sub> | -30  | 70  | °C   |

## 5.3 DC Characteristics

### 5.3.1 Typical Operating Conditions

| Item                          | Symbol          | Min        | Typ. | Max         | Unit | Remark |
|-------------------------------|-----------------|------------|------|-------------|------|--------|
| Analog Supply Voltage         | V <sub>CI</sub> | 2.7        | 3.3  | 3.6         | V    |        |
| Digital Supply Voltage        | VDDIO           | 1.65       | 1.8  | 1.95        | V    |        |
| AMOLED Power Supply           | Vbat            | 2.5        | 3.8  | 5.5         | V    |        |
| Input Current                 | Ivddio          | -          | 5.2  | 6.25        | mA   | Note1  |
|                               | Ivbat           | -          | 56   | 67.2        | mA   |        |
|                               | Itpvcc          | -          | 6.85 | 8.2         | mA   |        |
| 10% Pixel On full white 40nit | Vbat            | -          | 9.9  | -           | mA   | Note1  |
|                               | VDDIO           | -          | 3.6  | -           | mA   |        |
| Sleep current                 | Ivddio          | -          | 36.5 | -           | uA   | Note2  |
|                               | Ivbat           | -          | 254  | -           | uA   |        |
|                               | Itpvcc          | -          | 10   | -           | uA   |        |
| Low Level Input Voltage       | V <sub>IL</sub> | 0          | -    | 0.3 x IOVDD | V    |        |
| High Level Input Voltage      | V <sub>IH</sub> | 0.7 x VDDI | -    | VDD         | V    |        |
| Low Level Output Voltage      | V <sub>OL</sub> | 0          | -    | 0.2 x IOVDD | V    |        |
| High Level Output Voltage     | V <sub>OH</sub> | 0.8 x VDDI | -    | VDDI        | V    |        |

**Note1:** Full white display 430nits, 60Hz, V<sub>CI</sub>=3.3V, ELVDD=+3.3V, ELVSS=-3.3V, Vbat current includes VCI current.

**Note2:** Command 0x28, 0x10, V<sub>CI</sub>=3.3V, VDDIO=1.8V, ELVDD, ELVSS=0V

## 6 Reliability

| Test Item                               | Content of Test   | Test Condition          | Note |
|---|---|-------------------------|------|
| High Temperature Storage                | Endurance test applying the high storage temperature for a long time.   | 70°C<br>240hrs          | 2    |
| Low Temperature Storage                 | Endurance test applying the high storage temperature for a long time.   | -30°C<br>100hrs         | 1,2  |
| High Temperature Operation              | Endurance test applying the electric stress (Voltage & Current) and the thermal stress to the element for a long time.  | 60°C<br>240hrs          | -    |
| Low Temperature Operation               | Endurance test applying the electric stress under low temperature for a long time.  | -20 °C<br>240hrs        | 1    |
| High Temperature/<br>Humidity Operation | The module should be allowed to stand at 60°C,90%RH max, for 96hrs under no-load condition excluding the polarizer. Then taking it out and drying it at normal temperature. | 60°C,90%RH<br>240hrs    | 1,2  |
| Thermal Shock Resistance                | The sample should be allowed stand the following 10 cycles of operation   | -40°C/70°C<br>100cycles | -    |

Note1: No dew condensation to be observed.

Note2: The function test shall be conducted after 4 hours storage at the normal. Temperature and humidity after remove from the rest chamber.

## 7 Warranty and Conditions
