THE AIRPURA H600

Specially designed for powerful particle filtration, the Airpura H600 offers a large true HEPA filter together with a Hi-C carbon weave filter to add light odor and chemical filtration. A pre-filter traps larger particles.

- ▶ **AN EXCELLENT CHOICE FOR ASTHMA AND ALLERGIES** Helps remove the airborne particles that trigger attacks.
- ▶ **A GERMICIDAL UV LAMP AVAILABLE AS AN OPTION** Sterilizes antigens and pathogens. Situated in the filter chamber for maximum efficiency.
- ▶ **REMOVES:** Pet dander, dust mites, pollen, mold spores, asbestos fibers, droplets.
- ▶ **EFFECTIVE FOR UP TO 186M²** Cleans the air approximately every 30 minutes.

HIGH QUALITY HEPA FILTER

- ▶ 40 square feet of filtration surface with 1" deep folds.
- ▶ The Hepa is warm rolled to avoid cracking at the folds and avoid leakage.
- ▶ Spacers keep the folds open and make sure that all the surface area is filtering.

LONG LASTING FILTERS

Hepa filters typically last 5 years in regular use.

Pre-filters can be vacuumed from the exterior of the unit and should be changed every 12 months depending on use.

Hi-C carbon weaves should be changed every 4-6 months depending on use
