

Grow Tent Assembly Instructions

- 1 Connect the grow tent framework ensuring that the poles are seated properly in the corner connectors. It may be necessary to gently twist the poles back and forth until the connection tabs pop-out and lock into place.

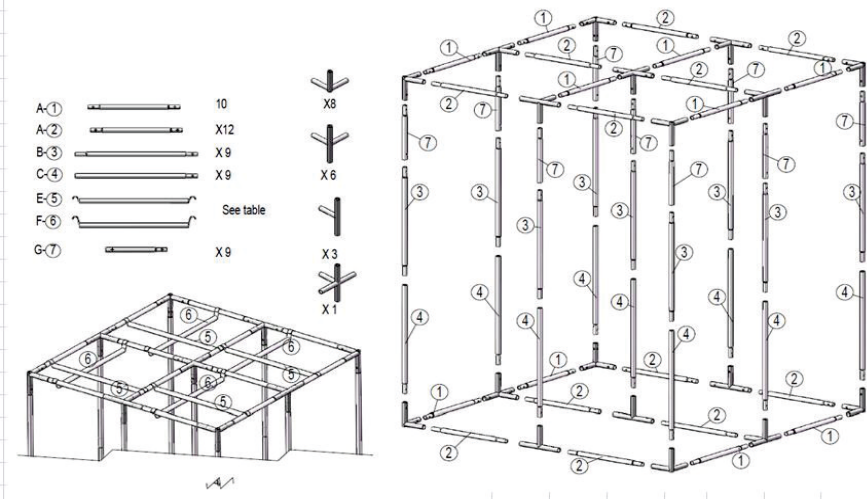

Tent size	Tube						
	1(A)	2(A)	3(B)	4C	5(E)	6(F)	7(G)

Instructions For GG style Grow Tent

1) Once you have the framework complete, lay the fabric out and find the base. Fit the bottom of the frame into the base of the tent material. It should fit snug in all corners. Zip the base completely until the tent is fully wrapped around the bottom of the frame.

2) Fit the top of the tent onto the top of the frame. For the easiest installation, pull down each corner of the top part down over the frame evenly. The top will fit snug against the frame. Note: Your tent may come with the extension already attached to the top, this is okay and just proceed to snug down the top with the extension.

3) Install the extension to the top if it did not come installed. Start front the back of the tent zipping your way around the frame. Note: The front of the 1 ft. extension is the side without the zipper seam; the zipper will be on the back of the tent.

4) Finish zipping up your tent and congratulations, you are ready to start growing. If you have any questions, please feel free to reach out to us!
