

Drugs for emollients, cracks, eczema

This manual should be stored with drug, and be sure to read before use.

A • E • P ointment

A•E•P ointment is an ointment consisting of retinol palmitate, which improves mucosal dryness and cornification, and tocopherol acetate, which improves peripheral circulatory disturbances, combined with gelatinized hydrocarbons. It is a skin preparation for use on the elbows, knees, heels, rough fingertips and palms, cracks, spots, and grapes.
